chronology of the world's seven archangelic regents has been part of Western esoteric teaching. According to this tradition, 1879 marked the return of the solar spirit Michael, the archangel of the Sun, to oversee earthly evolution. Steiner always placed his life and work in the service of Michael's evolutionary task. And he recognized that at the beginning of the twentieth century, humanity emerged from the Kali Yuga, the Dark Age, and entered the Age of Light. Against this background, Steiner described the ascent of Michael as cosmic ruler, his battle with the dragon of the spirits of darkness, and his roles as the countenance of Christ and the guardian of cosmic intelligence. He also gave many profound indications of how Michael's evolutionary task depends on the free and independent collaboration of human coworkers. Speaking on behalf of Michael, Steiner laid out the essentials for a new Michaelic path to full humanity. Among the elements of this path are the development of selfless individuality, cosmopolitanism, the practice of the presence of Christ, fearlessness, the transformation of thinking and perception in a new synthesis of science, art, and religion, the spiritualization of space, and the separation of thought from language. The Archangel Michael gathers most of Steiner's statements on this subject, making it an important source for coming to terms with today's political, social, psychological, and spiritual crises.

Angels George J. Marshall, 2015-08-13. In the 1990s alone, more than 400 works on angels were published, adding to an already burgeoning genre. Throughout the centuries, angels have been featured in, among others, theological works, on scripture studies, in comparative religions, works on art, architecture, and music, philological studies, philosophical, sociological, anthropological, archeological, and psychological works, and even a psychoanalytical study of the implications that our understanding of angels has for our understanding of sexual differences. This bibliography lists 4,355 works alphabetically by author. Each entry contains a source for the reference, often a Library of Congress call number, followed by the name of a university that holds the work. More than 750 of the entries are annotated. Extensive indexes to names, subjects, and centuries provide further utility.
