The Woman Beneath The Skin The Woman Beneath The Skin:

The Woman Beneath the Skin Barbara Duden,1991 Duden asserts that the most basic biological and medical terms that we use to describe our own bodies male and female healthy or sick are cultural constructions To illustrate this she delves into records of an 18th century German physician who documented the medical histories of 1 800 women of all ages and backgrounds often in their own words The Woman Beneath the Skin ,1991 **Beyond the Body Proper** Margaret

M. Lock,Judith Farquhar,2007 A theoretically sophisticated and cross disciplinary reader in the anthropology of the body

Gender, Sexuality, and Power in Latin America Since Independence William E. French,Katherine Elaine Bliss,2007 Integrates gender and sexuality into the main currents of historical interpretation concerning Latin America *Subversive Spiritualities* Frédérique Apffel-Marglin,2011 Even in the twenty first century some two thirds of the world s peoples quietly live in non modern non cosmopolitan places In such places the multitudinous voices of the spirits deities and other denizens of the other than human world continue to be heard continue to be loved or feared or both continue to accompany human beings in all their activities In *Subversive Spiritualities* Fr d rique Apffel Marglin draws on a lifetime of work with the indigenous peoples of Peru and India to support her argument that the beliefs values and practices of such traditional peoples are eco metaphysically true In other words they recognize that human beings are in communion with other beings in nature that have agency and are kinds of spiritual intelligences with whom humans can be in relationship and communion Ritual is the medium for communicating reciprocating creating and working with the other than humans who daily remind the humans that the world is not for humans exclusive use Apffel Marglin argues that when such relationships are appropriately robust human lifeways are rich rewarding and in the contemporary jargon environmentally sustainable Her ultimate objective is to re entangle humans in nature by promoting a spirituality and ecology of belonging and connection to nature and an appreciation of animistic perception and ecologies Along the way she offers provocative and poignant critiques of many assumptions of the development paradigm as benign including feminist forms of development advocacy of most anthropological and other social scientific understandings of indigenous religions and of common views about peasant and indigenous agronomy She concludes with a case study of the fair trade movement illuminating both its shortcomings how it echoes some of the assumptions in the development paradigms and its promise as a way to rekindle community between humans as well as between humans and the other than human world Surgery, Skin and Syphilis Philip K.

Wilson,2016-08-22 Daniel Turner s prolific writings provide valuable insight into the practice of a commonplace Enlightenment London surgeon Examining his personal professional and genteel achievements Enhances our understanding of the boundary between surgeons and physicians in Enlightenment marketplace practice Turner s pioneering writing on skin disease *De Morbis Cutaneis* emphasizes the skin s role as a physical and professional boundary between university educated physicians who treated internal disease and apprentice trained surgeons relegated to the care of external disorders Turner s

career long crusade against quackery and his voluminous writings on syphilis a common surgical disorder provide a refined view into distinction between orthodox and quack practices in eighteenth century London

Magic, Body and the Self in Eighteenth-Century Sweden Jacqueline Van Gent, 2009 Contrary to previous assumptions magic remained an integral part of everyday life in Enlightenment Europe This book demonstrates that the endurance of magical practices both benevolent and malevolent was grounded in early modern perceptions of an interconnected body self and spiritual cosmos Drawing on eighteenth century Swedish witchcraft trials which are exceptionally detailed these notions of embodiment and selfhood are explored in depth The nuanced analysis of healing magic the role of emotions the politics of evidence and proof and the very ambiguity of magical rituals reveals a surprising syncretism of Christian and pre Christian elements The book provides a unique insight to the history of magic and witchcraft the study of eighteenth century religion and culture and to our understanding of body and self in the past

The Devil Within Brian Levack, 2020-08-11 A fascinating wide ranging survey of the history of demon possession and exorcism through the ages In the sixteenth and seventeenth centuries the era of the Reformation thousands of Europeans were thought to be possessed by demons In response to their horrifying symptoms violent convulsions displays of preternatural strength vomiting of foreign objects displaying contempt for sacred objects and others exorcists were summoned to expel the evil spirits from victims bodies This compelling book focuses on possession and exorcism in the Reformation period but also reaches back to the fifteenth century and forward to our own times Entire convents of nuns in French Italian and Spanish towns thirty boys in an Amsterdam orphanage a small group of young girls in Salem Massachusetts these are among the instances of demon possession in the United States and throughout Europe that Brian Levack closely examines taking into account the diverse interpretations of generations of theologians biblical scholars pastors physicians anthropologists psychiatrists and historians Challenging the commonly held belief that possession signals physical or mental illness the author argues that demoniacs and exorcists consciously or not are following their various religious cultures and their performances can only be understood in those contexts Riveting and readable must reading for students of history psychology and religion Publishers Weekly Levack a distinguished historian of early modern witchcraft now sets exorcism in a long historical perspective providing the most comprehensive and scholarly overview of the theme yet published Peter Marshall Times Literary Supplement

Body and Tradition in Nineteenth-Century France William G. Pooley, 2019-12-05 The moorlands of Gascony are often considered one of the most dramatic examples of top down rural modernization in nineteenth century Europe From an area of open moors they were transformed in one generation into the largest man made forest in Europe Body and Tradition in Nineteenth Century France explores how these changes were experienced and negotiated by the people who lived there drawing on the immense ethnographic archive of Felix Arnaudin 1844 1921 The study places the songs stories and everyday speech that Arnaudin collected as well as the photographs he took in the everyday lives of agricultural workers and artisans It argues that the changes were understood as a gradual

revolution in bodily experiences as men and women forged new working habits new sexual relations and new ways of conceiving of their own bodies Rather than merely presenting a story of top down reform this is an account of the flexibility and creativity of the cultural traditions of the working population William G Pooley tells the story of the folklorist Arnaudin and the men and women whose cultural traditions he recorded then uncovers the work carried out by Arnaudin to explore everyday speech about the body stories of werewolves and shapeshifters tales of animal cunning and exploitation and songs about love and courtship The volume focuses on the lives of a handful of the most talented storytellers and singers Arnaudin encountered showing how their cultural choices reflect wider patterns of behaviour in the region and across rural Europe

Medicine, Religion, and Magic in Early Stuart England Ofer Hadass, 2018-03-26 The astrologer physician Richard Napier 1559 1634 was not only a man of practical science and medicine but also a master of occult arts and a devout parish rector who purportedly held conversations with angels This new interpretation of Napier reveals him to be a coherent and methodical man whose burning desire for certain true knowledge contributed to the contemporary venture of putting existing knowledge to useful ends Originally trained in theology and ordained as an Anglican priest Napier later studied astrological medicine and combined astrology religious thought and image and ritual magic in his medical work Ofer Hadass draws on a remarkable archive of Napier s medical cases and religious writings including the interviews he claimed to have held with angels to show how Napier s seemingly inconsistent approaches were rooted in an inclusive and coherent worldview combining equal respect for ancient authority and for experientially derived knowledge Napier s endeavors exemplify the fruitful relationship between religion and science that offered a well founded alternative to the rising mechanistic explanation of nature at the time Carefully researched and compellingly told Medicine Religion and Magic in Early Stuart England is an insightful exploration of one of the most fascinating figures at the intersection of medicine magic and theology in early modern England and of the healing methods employed by physicians of the era
