The War Against Animals Critical Animal Studies:

The War Against Animals Dinesh Joseph Wadiwel, 2015-06-25 In *The War against Animals* Dinesh Wadiwel draws on critical political theory to provide a provocative account of how our mainstay relationships with animals are founded upon systemic hostility and bio political sovereign violence

The War against Animals Dinesh Wadiwel, 2015-06-24 Are non human animals our friends or enemies In this provocative book Dinesh Wadiwel argues that our mainstay relationships with billions of animals are essentially hostile *The War against Animals* asks us to interrogate this sustained violence across its intersubjective institutional and epistemic dimensions Drawing from Foucault Spivak and Derrida *The War against Animals* argues that our sovereign claim of superiority over other animals is founded on nothing else but violence Through innovative readings of Locke and Marx Dinesh Wadiwel argues that property in animals represents a bio political conquest that aims to secure animals as the spoils of war The goal for pro animal advocacy must be to challenge this violent sovereignty and recognize animal resistance through forms of counter conduct and truce

The War Against Nonhuman Animals Stacy Banwell, 2023-05-09 We are currently engaged in an existential species war against nonhuman animals This book argues that during this war nonhuman animals should be granted legal personhood and treated as protected persons rather than the property of protected persons The main argument is that War Crimes and Crimes against Humanity rape forced pregnancy and other acts of sexual violence are being committed within the meat egg and dairy industries Avoiding dreaded comparisons the book explores shared sources of oppression between human and nonhuman animals who are subject to the expressions and consequences of reproductive violence It asks what drives and facilitates the war against nonhuman animals And what are the global consequences of this war Throughout it demonstrates how racism sexism and speciesism informs both intrahuman violence and the violence s of the animal industrial complex Ultimately the book asks us to reconsider what it means to be human

volume is very useful given its conciseness its all star cast of contributors and its breadth in providing a guide to some of the key ideas Colin Jerolmack New York University

The Rise of Critical Animal Studies Nik Taylor, Richard Twine, 2014-04-16 As the scholarly and interdisciplinary study of human animal relations becomes crucial to the urgent questions of our time notably in relation to environmental crisis this collection explores the inner tensions within the relatively new and broad field of animal studies This provides a platform for the latest critical thinking on the condition and experience of animals The volume is structured around four sections engaging theory doing critical animal studies critical animal studies and anti capitalism contesting the human liberating the animal veganism and activism The Rise of Critical Animal Studies demonstrates the centrality of the contribution of critical animal studies to vitally important contemporary debates and considers future directions for the field This edited collection will be useful for students and scholars of sociology gender studies psychology geography and social work

Biopolitical Animal Carlo Salzani, Felice Cimatti, 2024-11-30 The two issues around which this collection revolves are that it is impossible to address biopolitics without taking the animal question into account and that the animal question inherently concerns the politics of life beyond species barriers Although biopolitical theories are necessarily structured around animal metaphors they predominantly refer to human corporeality On the other hand the animal question is typically treated as an ethical issue that is a question of how human beings the dominant species ought to learn how to live peaceably with and respect other forms of life This collection of essays by leading scholars in the fields of biopolitics and animal studies problematises reconceptualises and redefines these categories in order to realise the full potential of the biopolitical framework of analysis in the context of animal studies and praxis

Meat Culture Annie Potts, 2016-11-21 The analysis of meat and its place in Western culture has been central to Human Animal Studies as a field It is even more urgent now as global meat and dairy production are projected to rise dramatically by 2050 While the term carnism denotes the invisible belief system or ideology that naturalizes and normalizes meat consumption in this volume we focus on meat culture which refers to all the tangible and practical forms through which carnist ideology is expressed and lived Featuring new work from leading Australasian European and North American scholars Meat Culture edited by Annie Potts interrogates the representations and discourses practices and behaviours diets and tastes that generate shared beliefs about perspectives on and experiences of meat in the 21st century
