Gentleman ,1925 The Children's Health Insurance Program David G. Smith,2017-09-08 The Children s Health Insurance Program was crafted in a period of intense partisan and ideological controversy over health care entitlements to provide creditable coverage for American children below 200 percent of the Federal Poverty Level This objective was widely supported though achieved only by a compromise between the structural alternatives of a block grant similar to the Maternal and Child Health Block Grant or an entitlement resembling Medicaid According to David G Smith the CHIP compromise has been a successful experiment that far exceeded expectations both in identifying and enrolling targeted low income children and in earning political capital He argues that beyond this core mission the reauthorization of CHIPRA Children s Health Insurance Program Reauthorization Act of 2009 invites a larger mission going beyond enrollment of children to include assuring access improving quality and containing costs of health care for them Extending this thrust the author notes that CHIP could be used to establish children s health as a niche much like care for the elderly within the larger scheme of health care insurance for all Several areas of successful performance needed for the program to be adjudged a success as well as its limitations are discussed in the book These areas include initial implementation enrolling kids federal state relations and the uses and misuses of waivers to modify the program A description of changes made by the CHIPRA reauthorization and the new Patient Protection Affordable Care Act PPACA is also included This is followed by a consideration of lessons learned from CHIP s evolution and recommendations for future development In short this is a valuable and readable account for those interested in the current and future trends of health care for the young **Health and Health Care Delivery in Canada - E-Book** Valerie D.
