

A dark, moody landscape with a cloudy sky and a small bird in flight. The sky is filled with heavy, dark clouds, and a single bird is seen flying in the upper center. The ground below is a dark, textured surface, possibly a beach or a field, with some lighter patches of sand or grass. The overall atmosphere is somber and contemplative.

For God is the wholeness of life, which includes every possible aspect of man and is known in accepting the whole of our experience at each moment.

Alan W. Watts

The Wholeness Of Life

Jiddu Krishnamurti

The Wholeness Of Life:

The Wholeness of Life Jiddu Krishnamurti, 1990 **The Wholeness of Life** Jiddu Krishnamurti, 1981 *The Transformation Of Man - The Wholeness Of Life* Jiddu Krishnamurti, 1978 *The Nature of Order: The process of creating life* Christopher Alexander, 2002 This four volume work allows the reader to form one picture of the world in which the perspectives from science beauty and grace and commonsense intuitions are interlaced **The Nature of Order, Book Two: The Process of Creating Life** Christopher Alexander, 2020-03-30 Scientifically this is perhaps the most exciting of the four books How do beautiful creations come into being Nature can make an infinite number of human faces each one unique each one beautiful The same is true for daffodils streams and stars But man made creations especially the towns and buildings of the 20th century have only occasionally been really good more often mediocre and in the last 50 years have most often been deadly What is the reason for the difference It hinges on the deep nature of the processes we use Merely understanding the geometry of beautiful and living form the topic of Book 1 is not enough to help us create such a living geometry In the 20th century our society was locked into deadly processes which created our current built environment process that most people were not really aware of and did not question Despite their best efforts and intentions architects and planners working within these processes could not achieve a living built environment Life and beauty in the built world arise only from processes which allow living structure to unfold The secret lies in knowing as nature does what must happen in what order what sequence of events allows a living form to unfold successfully Here in Book 2 Alexander puts forward a fully developed theory of living process He defines conditions for a process to be living that is capable of generating living structure He shows how such processes work and how they may be created At the core of the new theory is the theory of structure preserving transformations This concept new in scientific thinking is based on the concept of wholeness defined in Book 1 A structure preserving transformation is one which preserves extends and enhances the wholeness of a system Structure preserving transformations provide the means for any step by step process social biological architectural or technical to reach configurations which are most profound most capable of supporting life The process of creation whether in the formation of a single object or in the piece meal aggregation of a town requires this sort of generative process a careful and deliberate sequence of steps in which each step creates the context for the next one and each next wholeness is derived from the previous wholeness Our billions of beautiful and unique human faces come from one class of sequences Driven by these sequences an initial cell differentiates again and again until beautiful and complex human beings emerge infinitely various always harmonious Making changes in society so that streets buildings rooms gardens and towns may be generated by hundreds of such sequences requires massive transformations This book is the first blueprint of those transformations

Ethics and the Between William Desmond, 2001-02-01 In *Ethics and the Between* William Desmond addresses our current perplexities regarding the devaluation of being in modernity and the shadow of ethical nihilism He rethinks the

sources of value the diverse ethical ways the nature of ethical selving and communities and articulates the necessity for a comprehensive reconstructive thinking about the meaning of being good consonant with the response to the question of being in Being and the Between the first book of a planned trilogy **The Nature of Order, Book One: The Phenomenon of Life** Christopher Alexander,2020-03-30 Christopher Alexander s series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In The Phenomenon of Life the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according t his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific though from 1600 to 2000 have finally been united Living the Sabbath (The Christian Practice of Everyday Life) Norman Wirzba,2006-12-01 Sabbath is one day a week when we should rest from our otherwise harried lives right In Living the Sabbath Norman Wirzba leads us to a much more holistic and rewarding understanding of Sabbath keeping Wirzba shows how Sabbath is ultimately about delight in the goodness that God has made in everything we do every day of the week With practical examples Wirzba unpacks what that means for our daily lives at work in our homes in our economies in school in our treatment of creation and in church This book will appeal to clergy and laypeople alike and to all who are seeking ways to discover the transformative power of Sabbath in their lives today **Towards a Philosophy of Cosmic Life** David Bartosch,Attila Grandpierre,Bai Peng,2023-08-22 Just as the six branches of a snow crystal converge in regular proportions toward their common center the six contributions to this book point toward a future philosophy of cosmic life In this sense this edited volume represents a multidisciplinary and transcultural polylogue of distinguished authors from three continents which aims to establish highly innovative perspectives and open new frontiers of developing philosophical reflections and scientific foundations for the emergence of a common cosmic consciousness for an integral ecology and for a cooperative planetary civilization of humanity John B Cobb Jr uses a process philosophical foundation to describe life as living events

expressing novelty and the cosmos as a process of self enriching and self evolving Life Itself Chandra Wickramasinghe unfolds his scientific and philosophical perspective on cosmic life in twelve successive steps offering a wide range of arguments and insights that support an up to date theory of panspermia Attila Grandpierre presents the Cosmic Life Principle and the comprehensive science based upon it that is inextricably linked to the healthy and cooperative civilization to the biological laws of nature to the laws of logic to the uplifting of the well being of people and ecological communities Chunyou Yan introduces the approach of his holographic philosophy according to which the universe must be understood as a vast living entity every aspect of which represents life Bei Peng shows that the proportions of energy meridians in traditional Chinese medicine correspond to musical intervals and on this basis she demonstrates the analogy of the human body to macrocosmic phenomena David Bartosch offers an examination of three important systematic foundations for a poly contextual transcultural philosophy of cosmic life with roots in Greek Chinese South and West Asian and European traditions of thought **The Metaphysical Magazine** ,1895

Delve into the emotional tapestry woven by in Experience **The Wholeness Of Life** .
