Establishing Predominance of English for Specific Purposes within Adult English Language Teaching Nijolė Burkšaitienė, Nadežda Stojković, 2019-01-22 English for Specific Purposes (ESP) has accumulated substantial tradition in practice, research and theory. It is a common approach in English Language Teaching (ELT) among adults today, starting with high schools, then in academia, pre and in service training and life long learning programs. The role of ESP in each of these is to facilitate work in today's inevitably international business and scientific environment. It provides language training based on the precise simulation of communicative situations found in the

surroundings for which learners are preparing including for example domain specific vocabulary syntactic and morphological structures text and speech content structuring stylistics intercultural competence At present when English is present either as a foreign or second language learning General English GE is to a large degree accomplished before learners start needing English for their jobs In this way ESP does not complete GE but builds upon the foundations laid by it in learners prior education ESP is a channel of communication for the contemporary academia and economics However even so these are still early days for ESP as it does not yet have a recognised place within academia Only very recently have we begun to witness the occasional but encouraging emergence of ESP academic courses and departments This book thus explores practice and research conducted and under way in this field of ELT in order to assist its recognition as an autonomous academic discipline

Handbook of Individual Differences in Reading Peter Afflerbach, 2015-08-11 The central unifying theme of this state of the art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading Previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationships of individual differences to reading development and to account for interactions among individual differences Addressing developments in each of these areas this volume also describes affective individual differences and the environments in which individual differences in reading may emerge

operate interact and change The scant comprehensive accounting of individual differences in reading is reflected in the nature of reading instruction programs today the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed An important contribution of this volume is to provide prima facie evidence of the benefits of broad conceptualization of the ways in which readers differ The Handbook of Individual Differences in Reading moves the field forward by encompassing cognitive non cognitive contextual and methodological concerns Its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area
