

5.2 Software

5.2.1 The version numbers of the "legally relevant software" is either "768C App Basic" for the E1105 / E1110 controller, or "769C App Advanced" for the E1205 / E1210 controller.

5.2.2 The software of the pack flow management device (e.g. PLC) does not contain any legally relevant software. The software sends commands to the indicator in response to inputs such as pack detection, speed, weighing operation from the indicator. The software is application specific, the operation of which must be described in the application user manual required in section 3.2.

6 LOCATION OF SEALS AND VERIFICATION MARKS

6.1 The 'CE' marking, supplementary metrology marking and certificate number are located on the instrument, and must be clearly visible. The CE mark shall be impossible to remove without damaging it. The data plate shall be impossible to remove without it being destroyed.

The markings and inscriptions shall fulfil the requirements of Paragraph 9 of Annex I of the Directive 2004/22/EC.

6.2 Access to the configuration and calibration facility is password protected. The indicator increments a configuration and/or calibration value (designated as "config Event" and "Calibration Event" respectively) each time the indicator is re-configured and/or calibrated. The value(s) are recorded on a tamper evident label on or near the rating plate. The current value can be displayed by selecting either:-

"Super (F2)" – "Alter (F3)" – "→(F3) x 3" – "Audit (F1)" – "View (F2)", for the E1105 / E1110 controller, or

"Super (F2)" – "Alter (F3)" – "→(F5) x 3" – "Audit (F1)" – "View (F2)", for the E1205 / E1210 controller.

The dot matrix display then shows:

"Audit Trail" – "Calibration Events xx" – "Config Events xx".

Pressing "Escape (ESC)" - "Exit (F1)" - "Exit (F1)" returns the indicator to normal operating mode.

6.3 Alternatively, physical sealing may be used to protect the calibration and legally relevant parameters. Calibration and configuration modes can be entered via a push button located on the main PCB which is accessed by removing the front cover of the sealed enclosure

6.4 Components that may not be dismantled or adjusted by the user (load cell, calibration mode) will be secured by either a wire and seal or tamper evident label and securing mark. The securing mark may be either:

- a mark of the manufacturer and/or manufacturer's representative, or
- an official mark of a verification officer.
