

# Human Development Theories: The Science of Learning and Development

Topic: Sciences | Words: 400 | Pages: 1

There are many theories on how human development through different stages of life affects an individual's life and mental health. From the moment the first human development theory occurred, society took multiple attempts to define the exact stages of progression in human development, enhancing the previous ideas. This essay will define the current trends in the progression of human development theories and explore the role of education in human development theories.

The early human development theories were similar in the sense that they all were developed around the same time period and in the way they sequenced life events. Some of the human development theories even used previous theories as a guide. For example, Erikson initially took Freud's theory of development and modified it into his psychosocial theory. Moreover, even though all theories focused on different areas of human development, they all differentiated a number of stages connected to an individual's age.

The progression of human development theories implies theory-predicated methodological innovations in areas of research and application. According to Lerner et al. (2019), developmental science is placed at the frontier of refining concepts of human development theories into a dynamic and relational metatheory of the developmental system. In other words, in the current stage, the trends in the progression of

Theories of Human Learning Guy R. Lefrancois, 1995-03      *Theories of Human Learning* Guy R. Lefrancois, 1999-08 The old man isn't just anyone. In fact, professors familiar with previous editions of this book may conclude that he is related to those extraterrestrials Kongor and Kro who so successfully guided students through the maze of historic and current theories that help us understand how humans learn. And wise as he is, the old man does the job even more effectively than his predecessors in this Fourth Edition of THEORIES OF HUMAN LEARNING WHAT THE OLD MAN SAID. Both a serious academic text and a delightful story, this book offers a clear, readable look at a full range of learning theories from behavioristic to cognitive, examining memory and motivation and concluding with a comprehensive synthesis. Its most apparent strength is its easily accessible style, but its greatest value lies in the clarity of its concepts.      Theories of Human Learning Guy R.
