

The background of the slide features a photograph of a city construction site. Several large tower cranes are visible, some with red and white lattice structures. In the background, there are modern skyscrapers, including one with a distinctive blue glass facade. The sky is a pale yellow, suggesting a bright day. The image is partially obscured by a large blue diagonal banner that runs from the bottom left towards the top right.

Local Governance and Local Economic Development Josefa S. Edralin, 1996 The Ashgate Research Companion to Planning Theory Patsy Healey, 2016-11-03 At a time of potentially radical changes in the ways in which humans interact with their environments through financial environmental and or social crises the raison d tre of spatial planning faces significant conceptual and empirical challenges This Companion presents a multidimensional collection of critical narratives of conceptual challenges for spatial planning The authors draw on various disciplinary traditions and theoretical frames to explore different ways of conceptualising spatial planning and the challenges it faces Through problematising planning itself the values which underpin planning and theory practice relations contributions make visible the limits of established planning theories and illustrate how by thinking about new issues or about issues in new ways spatial planning might be advanced both theoretically and practically There cannot be definitive answers to the conceptual challenges posed but the

authors in this collection provoke critical questions and debates over important issues for spatial planning and its future. A key question is not so much what planning theory is but what might planning theory do in times of uncertainty and complexity. An underlying rationale is that planning theory and practice are intrinsically connected. The Companion is presented in three linked parts: issues which arise from an interactive understanding of the relations between planning ideas and the political/institutional contexts in which such ideas are put to work; key concepts in current theorising from mainly poststructuralist perspectives; and what discussion on complexity may offer planning theory and practice.

The Inclusive

City Ari-Veikko Anttiroiko, Martin de Jong, 2020-11-21 This book provides a conceptual framework for understanding the inclusive city. It clarifies the concept, dimensions and tensions of social and economic inclusion and outlines different forms of exclusion to which inclusion may be an antidote. The authors argue that as inclusion involves a range of inter group and intragroup tensions, the unifying role of local government is crucial in making inclusion a reality for all, as is also the adoption of an inclusive and collaborative governance style. The book emphasizes the need to shift from citizens' rights to value creation, thus building a connection with urban economic development. It demonstrates that inclusion is an opportunity to widen the local resource base, create collaborative synergies and improve conditions for entrepreneurship, which are conducive to the creation of shared urban prosperity. *Environment & Planning*, 2010

Understanding Local Economic Development Emil Malizia, Edward J. Feser, Henry Renski, Joshua Drucker, 2020-10-05 This book offers insights into the process and the practice of local economic development. Bridging the gap between theory and practice, it demonstrates the relevance of theory to inform local strategic planning in the context of widespread disparities in regional economic performance. The book summarizes the core theories of economic development, applies each of these to professional practice and provides detailed commentary on them. This updated second edition includes more recent contributions, regional innovation, agglomeration and dynamic theories and presents the major ideas that inform economic development strategic planning, particularly in the United States and Canada. The text offers theoretical insights that help explain why some regions thrive while others languish and why metropolitan economies often rise and fall over time. Without theory, economic developers can only do what is politically feasible. This text, however, provides them with a logical tool for thinking about development and establishing an independent basis from which to build the local consensus needed for evidence-based action undertaken in the public interest. Offering valuable perspectives on both the process and the practice of local and regional economic development, this book will be useful for both current and future economic developers to think more profoundly and confidently about their local economy.
