

Condenser-System Variations

Figure 29 Chiller-tower energy consumption

Figure 29 from Hydeman, et al., used with permission.

Condenser-water pump options

Chiller-pump balance

There are times when a system designer may choose to vary the condenser water flow in addition to, or instead of, the cooling-tower fan speed. This may be beneficial in systems with high pumping power. If a variable-speed drive is installed, the flow may be reduced and the pump power can be reduced substantially — approximately with the cube of the speed. Attempting to vary both the pump and the tower fan speeds is complex and requires adequate time for design and implementation.
