Theology In Built Environments Exploring Religion Architecture And Design:

Theology in Built Environments Sigurd Bergmann, 2017 Built space is both a physical entity as well as a socially and historically constructed place. It constantly interacts with human beings affecting their behavior, thinking, and feeling. Doing religious work in a particular environment implies acknowledging the surroundings to be integral to theology itself. The contributors to this volume view buildings, scriptures, conversations, prayers, preaching, artifacts, music, and drama, and built and natural surroundings as contributors to a contextual theology. The view of the environment in which religion is practiced as integrated with theology represents not just a new theme but also a necessity if one is to understand religion's own depth. Reflections about space and place and how they reflect and affect religious experience provide a challenge and an urgent necessity for theology. This is particularly important if religious practitioners are to become aware of how theology is given expression in the existential spatiality of life. Can space set theology free? This is a challenging question one that the editor hopes can be answered at least in part in this volume. The diversity of theoretical concepts in aesthetics, cultural theory, and architecture are not regarded as a problem to be solved by constructing one overarching dominant theory. Instead, this diversity is viewed in terms of its positive potential to inspire discourse about theology and aesthetics. In this discourse, theology does not need to become fully dependent on one or another theory but should always clearly present its criteria for choosing this or that theoretical framework. This volume shows clearly how different modes of design in sacred spaces capture a sense of the religious. This is a challenging question one that the editor hopes can be answered at least in part in this volume. The book also shows clearly how different modes of design in sacred spaces capture a sense of the religious. *The Routledge Handbook of Religion and Cities* Katie Day, Elise M. Edwards, 2020-12-31 Like an ecosystem, cities develop, change, thrive, adapt, expand, and contract through the interaction of myriad components. Religion is one of those living parts shaping and being shaped by urban contexts. The Routledge Handbook of Religion and Cities is an outstanding interdisciplinary reference source to the key topics, problems, and methodologies of this cutting-edge subject. Representing a diverse array of cities and religions, the common analytical approach is ecological and spatial. It is the first collection of its kind and reflects state-of-the-art research focusing on the interaction of religions and their urban contexts. Comprising 29 chapters by a team of international contributors, the Handbook is divided into three parts: Research methodologies, Religious frameworks and ideologies in urban contexts, Contemporary issues in religion and cities. Within these sections, emerging research and analysis of current dynamics of urban religions are examined, including housing, economics, and gentrification; sacred ritual and public space; immigration and the refugee crisis; political conflicts and social change; ethnic and religious diversity; urban policy and religion; racial justice; architecture and the built environment; religious art and symbology; religion and urban violence; technology and smart cities; the challenge of climate change for global cities; and religious meaning-making of the city. Theology in Stone Richard Kieckhefer, 2004-04-08 Thinking about church architecture has come to an impasse Reformers and traditionalists are talking past each other In Theology in Stone Richard Kieckhefer seeks to help both sides move beyond the standoff toward a fruitful conversation about houses of worship Drawing on a wide range of historical examples with an eye to their contemporary relevance he offers refreshing new ideas about the meanings and uses of church architecture

Temples for a Modern God Jay M. Price, 2012-11-02 Temples for a Modern God is one of the first major studies of American religious architecture in the postwar period and it reveals the diverse and complicated set of issues that emerged just as one of the nation's biggest building booms unfolded Jay Price tells the story of how a movement consisting of denominational architectural bureaus freelance consultants architects professional and religious organizations religious building journals professional conferences artistic studios and specialized businesses came to have a profound influence on the nature of sacred space Debates over architectural style coincided with equally significant changes in worship practice Meanwhile suburbanization and the baby boom required a new type of worship facility one that had to attract members and
