Theoretical Issues in Psychology John R. Morss, Niamh Stephenson, Hans van Rappard, 2013-06-29 *Theoretical Issues in Psychology* is published as the discipline of psychology enters its at least third century The year 2001 brings with it millennial reflections as well as the strange sense of déjà vu that we derive from the Kubrick movie As to the former a glance at the contents list of this volume will demonstrate both the maturity and the vigour of theoretical debate within psychology There is a level of sophistication here that should be the cause of quiet celebration Recent ideas about discursive practice and subjectivity chaos theory and autopoiesis are effortlessly entrained with classical issues Canonical texts are looked at with fresh eyes Unresolved social and political questions are doggedly persisted with and new perspectives on the human experience are pioneered We are not afraid of long words even if French in origin but nor are we afraid to recognise that we are physical beings who touch other beings who hold desire and remember and who talk talk talk For surely it is theoretically sensitive work in psychology whether critical or not that best represents what the discipline has to offer the wider community

Theoretical Issues in Psychology International Society for Theoretical Psychology. Conference, 2001-05-31 This eighth volume of the proceedings of the biennial conference of the International Society for

Theoretical Psychology continues the Society's exploration of issues in the sciences of the mind. Covered topics include narrative studies, language and discourse, perspectives on cultural psychology, identity and subjectivity, critical history and post-modern debates about constructivism vs realism. In short, the papers included in this volume present a concise summation of the state of theoretical psychology.

Theoretical Issues in Stuttering Ann Packman, Joseph S. Attanasio, 2017-07-06

Despite decades of research into the nature and treatment of stuttering, the causes and underlying mechanisms of it are still not well understood. In this unique and comprehensive overview of the numerous theories and models which seek to understand and explain stuttering, the authors of *Theoretical Issues in Stuttering* provide an invaluable account. Covering an impressive range of topics including past and current theories of stuttering, this edition provides the reader with an updated evaluation of the literature on the subject of stuttering alongside exploring the evolution of new theories. Placing each within the relevant historical context, the authors explore the contribution of theory to both understanding and managing stuttering. *Theoretical Issues in Stuttering* is a critical account of the models and theories which surround the subject of stuttering, aiming to act as a key resource for students of speech language pathology as well as lecturers, clinicians and researchers within the field.

Psychological Theories for Environmental Issues Mirilia Bonnes, 2017-03-02

Environmental psychology is an increasingly important area of research focusing on the individual and social factors responsible for many critical human responses to the physical environment. With such rapid and widespread growth, the main theoretical strands have often been left unclear and their scientific and practical implications have been underdeveloped. This essential and stimulating book contextualizes and critically analyzes the main theoretical ideas. It compares the different theories, assessing each one's possibilities and limitations and demonstrates how each approach has been used for the development of knowledge of environmental psychology. The research area infiltrates a broad selection of disciplines including psychology, architecture, planning, geography, sociology, environmental issues, economics and law. It also offers significant contributions to a wide range of policy evaluations. It will prove invaluable to academics and practitioners from across these disciplines, above all those in planning, environmental studies, human geography and psychology.

Theoretical Issues in Policy Analysis M. E.

Hawkesworth, 1988-08-09

What is the relation between policy analysis and political decision making? Is the policy analyst a handmaiden of democracy or an agent of technocracy? Do recent debates in the policy literature illuminate or obfuscate these issues? What analytic techniques are available to resolve such questions? This study considers the nature of policy inquiry in detail and explores norms and theoretical assumptions seldom subjected to scrutiny. The author demonstrates how conceptual presuppositions and methodological commitments have constricted our understanding of political problems and so hindered prescriptions for viable policy options. Proposed here is an alternative framework for policy inquiry that is both pragmatic and sophisticated. Hawkesworth considers the implications of this alternative model in a series of case studies that

addresses important foreign and domestic policy issues The epistemic and practical criticisms presented in this study provide new direction for the field of policy studies

Theoretical Issues in Contrastive Linguistics Jacek Fisiak, 1981-01-01

Contrastive Linguistics roughly defined as a subdiscipline of linguistics which is concerned with the comparison of two or more subsystems of languages has long been associated primarily with language teaching Apart from this applied aspect however it also has a strong theoretical purpose contributing to our understanding of language typology and language universals Issues in theoretical CL which also feature in this volume are the choice of model the notions of equivalence and contrast and directionality of descriptions Languages used for illustration in this volume include English German Danish and Polish

Reflections on Theoretical Issues in Argumentation Theory Frans H. van Eemeren, Bart Garssen, 2015-08-08

This volume presents a selection of papers reflecting key theoretical issues in argumentation theory Its six sections are devoted to specific themes including the analysis and evaluation of argumentation argument schemes and the contextual embedding of argumentation The section on general perspectives on argumentation discusses the trends of empiricalization contextualization and formalization offers descriptions of the analytical and evaluative tools of informal logic and highlights selected principles that argumentation theorists do and do not agree upon In turn the section on linguistic approaches to argumentation focuses on the problem of distinguishing between explanation and argument while also elaborating on the role of verbal indicators of argument schemes All essays included in this volume point out notable recent developments in the study of argumentation

The Foundations of Psychoanalytic Theories Vesa Talvitie, 2018-05-08

The normal approach to the study of the foundations of psychoanalysis is to focus on Sigmund Freud's classical texts In this

book however the author approaches the issue from the perspective of the foundations of behavioural sciences in general He studies the nature of psychological terms and explanations and the relation between neuroscience and psychology Due to the wide perspective the author is able to create a fresh view to the stubborn debate concerning the scientific status of psychoanalysis The author shows that both advocates and critics of psychoanalysis have a tendency to misconstrue the nature of psychoanalytic theorizing and thus have had unrealistic expectations of psychoanalytic explanations The book tries to differentiate between those aspects of psychoanalysis which should be considered scientific and those aspects of psychotherapies in general which should not come into the scientific category This books will be found to be a valuable contribution to the field of psychoanalytic studies

Praxiology and the Philosophy of Technology Wojciech W. Gasparski, Timo Airaksinen, 2011-12-31 Technology is a crucial feature of the modern world and human beings are necessarily technological creatures Our goal must be to use technology effectively efficiently and ethically We have hands that are adept at using tools and intelligence that guides our actions We also have desires and emotions that motivate us to achieve more and more never allowing us to stop From the viewpoint of praxiology technology does not exist merely to satisfy the human need in an effective and efficient way The problems of the modern world and the questions we must ask with respect to

technology and how it is used are complicated and demanding They may initially seem mysterious perhaps even partly subconscious In this fifteenth volume of a distinguished international series contributors address essential questions about the philosophy and ethics of technology Their intention is to point out the road not only to its better applications but also to its greater understanding The first part of the book addresses general questions about the theory of technology The second part of the volume focuses on special topics like information and communication technologies and work systems as well as the foundations of problem solving and the history of innovation in the age of enlightenment The third part of the book is on ethical judgments It emphasizes the importance of ethics in the application of technology and especially when we commercialize it in order to meet the needs of the people in a free market society This volume offers its reader a balanced picture of the state of the art of theoretical and applied issues in technology research emphasizing the praxiological perspective that characterizes the entire series
