Traces Of Light Absence And Presence In The Work Of Loe Fuller:

Traces of Light Ann Cooper Albright, 2007-09-04 The first major English language study of a legendary dancer **The Oxford Handbook of Screendance Studies** Douglas Rosenberg, 2016-06-03 The Oxford Handbook of Screendance Studies offers a full overview of the histories practices and critical and theoretical foundations of the rapidly changing landscape of screendance Drawing on their practices technologies theories and philosophies scholars from the fields of dance performance visual art cinema and media arts articulate the practice of screendance as an interdisciplinary hybrid form that has yet to be correctly sited as an academic field worthy of critical investigation Each chapter discusses and reframe current issues as a means of promoting and enriching dialogue within the wider community of dance and the moving image Topics addressed embrace politics of the body agency race and gender in screendance the relationship of choreography to image constructs of space and time representation and effacement production and curatorial practice and other areas of intersecting disciplines The Oxford Handbook of Screendance Studies features newly commissioned and original scholarship that will be essential reading for all those interested in the intersection of dance and the moving image including film and video makers dance artists screendance artists academics and writers producers composers as well as the wider interested public It will become an invaluable resource for researchers and professionals in the field Activating the Inanimate: Visual Vocabularies of Performance Practice Celia Morgan, Filipa Malva, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 The dynamic exchange of perspectives that constituted the 2nd Global Conference of Performance Visual Aspects of Performance Practice demonstrated that the foundational concept of the project is a vibrant platform for sharing and extending ideas within all aspects of scenographic practice in performance This volume is a compilation of papers that formed the basic structure of that conference The first four chapters present a developing schema of visual languages within theatre From Beckett Ibsen Svoboda to Wilson they navigate the symbolic and visual prioritizing of postdramatic scenographic forms Part 2 reconsiders the predetermined divisions that deflate experiential encounters with the inanimate Dance puppetry and slapstick provide examples of interaction between performers and their environment Part 3 addresses various renderings of design processes exploring the role of drawing fabric and body in creating a narrative Part 4 negotiates the sensitive interface between public and performance while looking at the Burning Man Festival flash mobs and opera media casting The final chapters represent a global collective of process strategies that confront the production and methodologies of meaning They engage with cultural presumptions and subjectivities in post Cultural Revolution China Spanish flamenco American Indian post colonial resistances and the traditions of Australian Aboriginal artists **Dancefilm** Erin Brannigan, 2011 Dancefilm traces some of the most significant collaborations between dancers choreographers and filmmakers and presents new models of cinematic movement that are both historically informed and thoroughly interdisciplinary Moving without a Body Stamatia Portanova, 2024-02-06 A radically empirical exploration of movement

and technology and the transformations of choreography in a digital realm Digital technologies offer the possibility of capturing storing and manipulating movement abstracting it from the body and transforming it into numerical information In *Moving without a Body* Stamatia Portanova considers what really happens when the physicality of movement is translated into a numerical code by a technological system Drawing on the radical empiricism of Gilles Deleuze and Alfred North Whitehead she argues that this does not amount to a technical assessment of software's capacity to record motion but requires a philosophical rethinking of what movement itself is or can become Discussing the development of different audiovisual tools and the shift from analog to digital she focuses on some choreographic realizations of this evolution including works by Loie Fuller and Merce Cunningham Throughout Portanova considers these technologies and dances as ways to think rather than just perform or perceive movement She distinguishes the choreographic thought from the performance a body performs a movement and a mind thinks or choreographs a dance Similarly she sees the move from analog to digital as a shift in conception rather than simply in technical realization Analyzing choreographic technologies for their capacity to redesign the way movement is thought *Moving without a Body* offers an ambitiously conceived reflection on the ontological implications of the encounter between movement and technological systems **Dance on Camera Journal**, 2008 *Journal of Folklore Research*, 2011 *Dance Research Journal*, 2007 **Library Journal** Melvil Dewey, Richard Rogers Bowker, L. Pylodet, Charles Ammi Cutter, Bertine Emma Weston, Karl Brown, Helen E. century world Linking somatics and politics author Ann Cooper Albright argues that a renewed attention to gravity as both a metaphoric sensibility and a physical experience can help transform moments of personal disorientation into an opportunity to reflect on the important relationship between individual resiliency and communal responsibility Long one of the nation's preeminent thinkers in dance studies Albright asks how contemporary bodies are affected by repeated images of falling bodies bombed out buildings and displaced peoples as well as recurring evocations of global economies and governments in discursive free fall or dissolution What kind of fear gets lodged in connective tissue when there is an underlying anxiety that certain aspects of our world are in danger of falling apart To answer this question she draws on analyses of perception from cognitive studies tracing the discussions of meaning body and language through the work of Sara Ahmed Jean Luc Nancy and Shaun Gallagher among others In addition she follows the past decade of debate in contemporary media concerning the implications of the weightless and two dimensional social media exchanges on structures of attention and learning as well as their effect on the personal growth and socialization of a generation of young adults Each chapter interweaves discussions of movement actions with their cultural implications documenting specific bodily experiences and then tracing their ideological ripples out through the world

Resistance and Support Ann Cooper Albright, 2024 Along with the rock music of the late 60s and early 70s dancing both reinforced and crystalized an image of the self independent yet communal free sensual daring also associated with contemporary social movements and practices such as the civil rights movement youth culture and drug taking and with values such as rebellion expressiveness and individualism within a loving community of peers Dancing encoded these ideas in a flexible and multi layered text its kinesthetic and structural characteristics laden with social implications and associations Novack 1990 38 Drawn passionately into the vortex of this revolutionary youth movement fifty years ago along with so many of my North American and Global North peers I recall how we danced together fervently but also purposefully We were dancing in clubs gymnasiums theaters and galleries in the streets parks our homes and at outdoor rock concerts Our way of moving freely alone and together was imbued with a constellation of meanings heralding a new era of liberties embarking on social experiments and not the least promoting world peace Going back to nature we lived in rural enclaves envisioned a natural foods movement with health and environmental concerns We imagined ourselves enacting the lives of counter cultural rebels
