PART 2: CHAPTER 7

OBJECTIVES: Consider three basic inheritance patterns: Mendel's First Law (Single Inheritance)

Examine how and how inheritance affects complex traits (such as those that involve multiple genes and interactions between all genes involved). E.g. 7.2, section 7.2, section 7.2 of chapter 7. Also consider the **epistasis** hypothesis, which is based on the fact that some genes are involved in the same pathway, and therefore they can affect each other's function. This is the case for some genes that affect the same pathway, and therefore they can affect each other's function. This is the case for some genes that affect the same pathway, and therefore they can affect each other's function.
