1. Introduction

Unity of Command is a strategy game that lets you command the Red Army or Wehrmacht forces and their allies during the crucial Eastern Front campaign of 1942/43. This is the campaign that culminated in the famous Battle of Stalingrad, an event that marked a turning point in the entire war.

German plans for this campaign centered on capturing the oil-rich regions of the Caucasus. Stalingrad, the city that would eventually become its main focus, was rarely even mentioned in the original plans prepared by the OGH (German High Command of the Army).

Soviets were on the defense strategically at the time, but the Stavka (Soviet High Command) misjudged enemy intentions and placed the bulk of its strength around Moscow. This helped the Germans as relatively thin forces remained to contend with the upcoming German offensive in the south.

The initial blow delivered by German armored spearheads thus proved devastating. The summer campaign began with a seemingly unstoppable string of German victories. But even in the heat of that victorious summer, cracks were beginning to show.

As they advanced eastward, the Germans carved an enormous bulge they could never hope to hold with German forces alone. To fill the gaps, they enlisted help from the armies of their Axis allies: Italy, Romania and Hungary.

The fast moving nature of the campaign also made it difficult to provide units with fuel, ammunition and other vital supplies. Time and again, German columns had to stop

It is in these circumstances during the fall of 1942 that the German offensive bogged down in the face of stiffening Soviet resistance. Their pace of advance slowed to a crawl. And the attention of the entire world became fixated on the desperate battle raging in the burning city of Stalingrad.

When Soviets finally counterattacked in November of 1942, the time of their attack changed the strategic situation overnight. The besiegers became the besieged. The German 6th Army in Stalingrad was encircled and destroyed, and the entire southern wing of the German Eastern Front threatened with collapse.

Soviets then mounted a series of strategic offensives that completely shattered the weaker Axis armies along the Don river. This advance threatened the Germans with an even wider encirclement and for a while an entire group of German Armies fought for its very survival in this madden and dramatic reversal of fortunes.

Then, in one final devastating stroke, Germans under von Manstein counter-attacked at Kharkov and restored the situation. Ironically, the armies finally came to rest on almost identical lines where the campaign started almost a year earlier.

Army Diplomacy Walter M. Hudson,2015-05-19 In the immediate aftermath of World War II the United States Army became the principal agent of American foreign policy The army designed implemented and administered the occupations of the defeated Axis powers Germany and Japan as well as many other nations Generals such as Lucius Clay in Germany Douglas MacArthur in Japan Mark Clark in Austria and John Hodge in Korea presided over these territories as proconsuls At the beginning of the Cold War more than 300 million people lived under some form of U S military authority The army s influence on nation building at the time was profound but most scholarship on foreign policy during this period concentrates on diplomacy at the highest levels of civilian government rather than the armed forces governance at the local level In *Army Diplomacy* Hudson explains how U S Army policies in the occupied nations represented the culmination of more than a century of military doctrine Focusing on Germany Austria and Korea Hudson s analysis reveals that while the post World War II American occupations are often remembered as overwhelming successes the actual results were mixed His study draws on military sociology and institutional analysis as well as international relations theory to demonstrate how bottom up decisions not only inform but also create higher level policy As the debate over post conflict occupations continues this fascinating work offers a valuable perspective on an important yet underexplored facet of Cold War history **From Teaching To**

Practice: General Walter Krueger And The Development Of Joint Operations, 1921-1945 Major George B. Eaton,2015-11-06 General Walter Krueger commanded the 6th Army in the Southwest Pacific Theater in World War II As the Commander 6th Army he led the troops that liberated New Guinea and the Philippines and he was designated as the commander of the forces scheduled to invade Japan Krueger s wartime accomplishments were simply a continuation of contributions made to the United States Army and Navy over a 47 year career Yet despite his achievements after the war Krueger simply faded away Krueger s lack of historical name recognition some 50 years after his greatest achievements deprives current officers and historians not only the knowledge of wartime exploits but also of significant understanding of the development of joint operations doctrine in the years between World War I and World War II The current consensus among historians is that the United States Marine Corps was responsible for the development of amphibious operations While true at the tactical level this paper demonstrates that the Army and Naval War Colleges and the Army and Navy General Staffs and War Plans Divisions were key players in the development of doctrine at the strategic and operational level

General Walter Krueger attended both war colleges served on the faculty of both war colleges and served two tours in the Army War Plans Division including a two year stint as its Chief He was on the Joint Board or the Joint Planning Committee for over six years The intent of this paper is to show Krueger s personal influence in the development of joint doctrine The paper considers Krueger s assignment history the war plans he developed his ideas on unity of command and the need for inter service understanding and his principles of war planning It includes a case study of the Lingayen Gulf Landing in January 1945 to demonstrate the acceptance and rejection of his key ideas The paper focuses on Army and Navy issues and considers air issues only tangentially
