The Principles of European Contract Law and Dutch Law:A Commentary

Ewoud H. Hondius,H. J. Van Kooten,2002-08-27 The topic of harmonisation of European private law and European contract law in particular is rapidly gaining in importance The topic is not only widely studied by academics and students all over Europe and even beyond it is also on the political agenda of the European Parliament the European Commission and the European Council The most important achievement in this field is no doubt the Principles of European Contract Law PECL drafted by the Commission on European Contract Law The European Commission considers the PECL to be a serious option for further harmonisation of European contract law within the European Union This publication is the first to provide a systematic overview of the PECL in comparison with Dutch contract law as a whole The book is concise and because of its structure it is easily accessible Amongst the contributors there are many highly distinguished contract law specialists It may be used at universities in courses on Comparative Law European Private Law and European Contract Law It may also be used by international practitioners foreign students and academics interested in Dutch contract law who do not have access to Dutch contract law because they have no knowledge of the Dutch language Last but not least the book will be of interest to all jurists interested in the harmonisation of the European Private Law

Cases, Materials and Text on Property Law Sjef van

Erp,Bram Akkermans,2012-07-23 This casebook presents a deep comparative analysis of property law systems in Europe ie the law of immovables movables and claims offering signposts and stepping stones for the reader wishing to explore this fascinating area The subject matter is explained with careful attention given to its history foundations thought patterns underlying principles and basic concepts The casebook focuses on uncovering differences and similarities between Europe s major legal systems French German Dutch and English law are examined while Austrian and Belgian law are also touched upon The book combines excerpts from primary source materials case law and legislation and from doctrine and soft law In

doing so it presents a faithful picture of the systems concerned Separate chapters deal with the various types of property rights their creation transfer and destruction with security rights such as mortgages pledges retention of title as well as with harmonising and unifying efforts at the EU and global level Through the functional approach taken by the Ius Commune Casebooks this volume clearly demonstrates that traditional comparative insights no longer hold The law of property used to be regarded as a product of historical developments and political ideology which were considered to be almost set in stone and assumed to render any substantial form of harmonisation or approximation very unlikely Even experienced comparative lawyers considered the divide between common law and civil law to be so deep that no common ground so it was thought could be found However economic integration in particular integration of financial markets and freedom of establishment has led to the integration of particular areas of property law such as mortgage law and enforceable security instruments eg retention of title This pressure towards integration has led comparative lawyers to refocus their interest from contract tort and unjustified enrichment to property law and delve beneath its surface This book reveals that today property law systems are closer to one another than previously assumed that common ground can be found and that differences can be analysed in a new light to enable comparison and further the development of property law in Europe

Indirect Representation in

European Contract Law Danny Busch, 2005-01-01 Over the last few years increasing attention continues to be paid to the Principles of European Contract Law otherwise known as the Principles the Lando Principles or PECL The drafters of the Principles presented their work in the form of articles accompanied by explanatory notes averring that the main purpose of the instrument is to serve as a basis for a future European contract law Can the Lando Principles as their drafters claim indeed offer an acceptable basis for a future European contract law Dr Busch both scholar and practitioner offers a detailed analysis in response to this question of the contractual aspects of indirect representation Arts 3 301 304 PECL He evaluates

these provisions in the light of Dutch German and English law as well as with reference to the Geneva Convention on Agency in the International Sale of Goods To introduce this important comparative study and make the background as complete as possible this book devotes separate chapters to thorough discussions of indirect representation in Dutch law middellijke vertegenwoordiging Arts 7 419 421 Dutch Civil Code in German law mittelbare Stellvertretung and in the English doctrine of the undisclosed principal Lawyers in Europe and elsewhere who must deal with contract law in any connection will find this thoroughly researched and well thought out text to be indispensable Its value as a scholarly analysis can only grow with the coming years D Busch b 1974 graduated cum laude in Dutch law from the University of Utrecht in 1997 He attained the title of Magister Juris in European and Comparative Law at the University of Oxford St John s College in 1998 and defended his dissertation in 2002 at the University of Utrecht Until the end of 2001 he was attached as lecturer and researcher to the Molengraaff Institute of Private Law in Utrecht Since 2002 he has worked as an attorney at law for the law office of De Brauw Blackstone Westbroek in Amsterdam He has also been an honorary senior lecturer at the Molengraaff Institute since 2004 Principles of European Contract Law 3 *Minimum Contract Justice* Lyn K L Tjon Soei Len, 2017-05-04 The collapse of the Rana Plaza in Bangladesh 2013 is one of many cases to invoke critical scrutiny and moral outrage regarding the conditions under which consumer goods sold on our markets are produced elsewhere In spite of abiding moral concerns these goods remain popular and consumers continue to buy them Such transactions for goods made under deplorable production conditions are usually presumed to count as normal market transactions ie transactions that are recognized as valid consumer contracts under the rules of contract law Minimum Contract Justice challenges this presumption of normality It explores the question of how theories of justice bear on such consumer contracts how should a society treat a transaction for a good made under deplorable conditions elsewhere This Book defends the position that a society that strives to be minimally just should not lend its power to enforce support or encourage transactions that are incompatible with the ability of others elsewhere to live decent human lives As such the book introduces a new perspective on the legal debate concerning deplorable production conditions that has settled around ideas of corporate responsibility and the pursuit of international labour rights
