Parental Intelligence Laurie Hollman, 2015-10-13 In *Unlocking Parental Intelligence* long experienced psychoanalyst Laurie Hollman PhD encourages parents to find the significance behind their child's behaviors by becoming meaning makers. Parental Intelligence is explained through compelling and empathic story telling that answers parents' questions: Why do children do what they do? What's on their minds? How can parents know their child's inner world? Through a clear five-step approach, parents discover the power and wisdom of a new parenting mindset that helps them learn what their kids think, want, intend, and feel. They see actions as communications. They are rewarded with open parent-child dialogue about the underlying problems hidden beneath the behaviors. As they problem-solve, parents discover misbehaviors are not only meaningful but a catalyst to change. Parents and professionals alike will find a new parenting approach from this invaluable book that will reshape families' lives and guide them through all stages of typical and atypical child development. This accessible read enlightens, uplifts, and relieves while cultivating critical thinking on the part of parents and children as they wrestle with the common and sometimes desperate vexations of family life.

Understanding Your Child's Temperament William B. Carey, 2004-12 *UNDERSTANDING YOUR CHILD'S TEMPERAMENT* From their earliest days, some children are shy and others are bold. A brother may be flexible while his sister is rigid. One child is highly active, another far less so. One may stick with a challenge for hours while another gives up easily. All children display distinct profiles of nine largely inborn temperament traits that determine how they experience their environments and respond to them. These interactions have a major impact on children's physical health, development, social behavior, and school performance, and on the caregivers themselves. If adults learn to recognize and tolerate temperament traits, they will be able to manage them more harmoniously and care for each child's individual needs. What an important book for parents to consider! Treating each child as an individual shows them the respect that will engender self-esteem in them later. This book about differences in temperament by Dr. William Carey, an esteemed pediatrician, will give parents the backup they need to treat each child individually. T. Berry Brazelton, M.D., Emeritus Professor of Pediatrics, Harvard Medical School, Author of numerous books on child development and care, America's favorite pediatrician. This classic work is now more useful than ever. The too-often neglected role of temperamental patterns is explained brilliantly so that all adults who live or work with kids can understand and manage these all-important differences between them. Mel Levine, M.D., Professor of Pediatrics, University of North Carolina Medical School, Author of national bestseller *A Mind at a Time* and 10 other books about children's learning issues.
