Unemployment Social Vulnerability And Health In Europe Health Systems Research:

Unemployment, Social Vulnerability, and Health in Europe Detlef Schwefel, Per-Gunnar Svensson, Herbert Zöllner, 2012-12-06 It is not easy to summarize the studies that have dealt with the health effects of unemployment on the unemployed. The main problem impeding a comparison of their results is the diversity of theoretical constructs associated with physical and especially mental health and above all an apparently inexhaustible variety of operationalizations of these constructs. It is significant that the six conclusions drawn from the present state of unemployment research by the organizers of a recent conference on the individual and social consequences of unemployment included the following request: In view of the relevant constructs it seems to be most urgent to find or to develop operationalizations which can be agreed upon in order to guarantee comparability of research results. Kieselbach and Wacker 1985 p. XX my translation. Nevertheless the results of these studies allow the statement that a negative influence of job loss on psychological well-being can be regarded as a validated finding. The influence on physical health however must be assessed very carefully and in a differentiated manner. The few investigations dealing with this question arrive at different conclusions, moreover possibly relieving effects of unemployment on health come into sight. Unemployment, Social Vulnerability, and Health in Europe Detlef Schwefel, Per-Gunnar Svensson, 1987 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1988 *International Directory of Health Services and Systems Research Centers*, 1991 **Unemployment, Poverty and Quality of Working Life** Bengt Starrin, Per-Gunnar Svensson, Helmut Wintersberger, 1989 Migration And Health In The European Union Rechel, Bernd, Mladovsky, Philipa, Devill?, Walter, 2011-12-01 This book can be read by anyone with an interest in migration and health, whether as an advocate for migrants' health, as a student in a health profession, researcher, or policy maker. It provides an ample orientation to the field in the European context. Among other important raised issues it underlines an all too often neglected fact: health is a human right. By involving broad issues and problem areas from a variety of perspectives, the volume illustrates that migration and health is a field that can not be allocated to a single discipline. Carin Björngren Cuadra, Senior Lecturer, Malmö University, Sweden. Migrants make up a growing share of European populations. However, all too often their situation is compounded by problems with accessing health and other basic services. There is a need for tailored health policies, but robust data on the health needs of migrants and how best these needs can be met are scarce. Written by a collaboration of authors from three key international organisations: the European Observatory on Health Systems and Policies, the EUPHA Section on Migrant and Ethnic Minority Health, and the International Organization for Migration, as well as leading researchers from across Europe, the book thoroughly explores the different aspects of migration and health in the EU and how they can be addressed by health systems. Structured into five easy-to-follow sections, the volume includes contributions from experts from across Europe. Key topics such as access to human rights and health care, health issues faced by migrants, and the national and European policy response so far. Conclusions drawn from the latest

available evidence Comprehensive information on different aspects of health and migration and how they can best be addressed by health systems is still not easy to find This book addresses this shortfall and will be of major value to researchers students policy makers and practitioners concerned with migration and health in an increasingly diverse Europe
