

Teoría Desarrollo Organizacional

1. EL DO, ORIGEN Y RESULTADO

Este movimiento de desarrollo organizacional, DO, se originó en 1962 como un conjunto complejo de ideas sobre las personas, las organizaciones y el medio ambiente con el objetivo de promover el crecimiento y el desarrollo de acuerdo con su potencial. DO es un enfoque orientado a la teoría del comportamiento para la práctica y el desempeño hacia un sistema.

- **El origen del DO se puede inculpar a varios factores:**

La dificultad de utilizar el concepto de diferentes teorías organizacionales, que ofrecen diferentes enfoques para el desarrollo organizacional, es el resultado de los esfuerzos de la teoría del comportamiento para promover el cambio, el cambio organizacional, la resiliencia y el conflicto con otras teorías:

1. Las teorías clásicas planteadas por Taylor y Fayol enfatizan la racionalización de las organizaciones formales y los métodos de trabajo, respectivamente. La organización científica desarrolló un enfoque rígido y mecanicista que veía al hombre como parte de una máquina desde un punto de vista simple y atómico (homo economicus). Se ha demostrado que esta teoría es incompleta y sesgada.
2. La teoría de las relaciones interpersonales propuesta por Mayo contradice el tradicionalismo de la teoría clásica. Hace hincapié en el entorno de trabajo humano (social) y psicológico. Las expectativas de los empleados, sus necesidades psicológicas, las organizaciones informales y las redes de comunicación son a menudo componentes centrales de la investigación gerencial. La administración reemplaza la autoridad jerárquica formal.
3. La teoría de la burocracia sienta las bases para un modelo organizativo ideal y racional que se puede replicar y aplicar a las empresas independientemente de sus unidades de negocio, y describe sus características importantes. La organización burocrática sigue siendo razonable sobre la base de la estructura militar de un ejército, pero los seguidores de Weber han afirmado una serie de ideales deformados e ideales teóricos de organización burocrática, falta de flexibilidad y la necesidad de adaptarse a las innovaciones de la sociedad moderna.
4. La teoría del comportamiento se desarrolló a partir de la teoría interpersonal, creando un importante enfoque social y motivacional. Las organizaciones son vistas como empresas sociales con vidas y culturas propias, donde se desarrollan métodos de gestión y sistemas organizativos para gestionar personas. A partir de ese momento surgen las normas de comportamiento organizacional, de comunicación y de todas las relaciones.
