United Nations Documents Index, July-September 2005 United Nations, 2006-12 The *United Nations Documents Index* provides information on documents and publications issued by United Nations offices worldwide The information is presented in nine sections covering the areas of documents and publications official records sales publications United Nations maps included in UN documents United Nations sheet maps United Nations document series symbols author index title index and subject index The index is a two part set Publishing Agency United Nations UN **Legitimacy, Peace Operations and Global-regional Security** Linnéa Gelot, 2012 This book focuses on the collaboration that takes place in the field of conflict management between the global centre and the African regional level It moves beyond the dominant framework on regional global security partnerships which mainly considers one sided legal and political factors Instead new perspectives on the relationships are presented through the lens of international legitimacy The book argues that the AU and the UN Security Council fight for legitimacy to ensure their positions of authority and to improve the chances of success of their activities It demonstrates in regard to the case of Darfur why and how legitimacy matters for states international organisations and also for global actors and local populations Page iii of paperback version [Movements for Human Rights](#) David L. Brunsma, Keri Iyall Smith, Brian Gran, 2016-09-07 How do people work together to advance human rights Do people form groups to prevent human rights from being enforced Why In what ways do circumstances matter to the work of individuals collectively working to shape human rights practices Human society is made of individuals within contexts tectonic plates not of the earth's crust but of groups and individuals who scrape and shift as we bump along competing for

scarce resources and getting along These movements large and small are the products of actions individuals take in communities within families and legal structures These individuals are able to live longer yet continue to remain vulnerable to dangers arising from the environment substances struggles for power and a failure to understand that in most ways we are the same as our neighbors Yet it is because we live together in layers of diverse communities that we want our ability to speak to be unhindered by others use spirituality to help us understand ourselves and others possess a space and objects that are ours alone and join with groups that share our values and interests including circumstances where we do not know who our fellow neighbor is For this reason sociologists have identified the importance of movements and change in human societies When we collaborate in groups individuals can change the contours of their daily lives Within this book you will find the building blocks for human rights in our communities To understand why sometimes we enjoy human rights and other times we experience vulnerability and risk sociologists seek to understand the individual within her context Bringing together prominent sociologists to grapple with these questions *Movements for Human Rights Locally and Globally* offers insights into the ways that people move for and against human rights

Combating Proliferation Jason D. Ellis, Geoffrey D. Kiefer, 2007-02-23 Selected by Choice Magazine as an Outstanding Academic Title The intelligence community s flawed assessment of Iraq s weapons systems and the Bush administration s decision to go to war in part based on those assessments illustrates the political and policy challenges of combating the proliferation of weapons of mass destruction In this comprehensive assessment defense policy

specialists Jason Ellis and Geoffrey Kiefer find disturbing trends in both the collection and analysis of intelligence and in its use in the development and implementation of security policy Analyzing a broad range of recent case studies Pakistan s development of nuclear weapons North Korea s defiance of U N watchdogs Russia s transfer of nuclear and missile technology to Iran and China s to Pakistan the Soviet biological warfare program weapons inspections in Iraq and others the authors find that intelligence collection and analysis relating to WMD proliferation are becoming more difficult that policy toward rogue states and regional allies requires difficult tradeoffs and that using military action to fight nuclear proliferation presents intractable operational challenges Ellis and Kiefer reveal that decisions to use or overlook intelligence are often made for starkly political reasons They document the Bush administration s policy shift from nonproliferation which emphasizes diplomatic tools such as sanctions and demarches to counterproliferation which at times employs interventionist and preemptive actions They conclude with cogent recommendations for intelligence services and policy makers **The**
