United States Navy Aircraft Since 1911:

United States Navy Aircraft Since 1911 Gordon Swanborough, Peter M. Bowers, 1990 United States Navy Aircraft since 1911 has been completely revised and updated and like the earlier editions will become the standard reference work covering all the aircraft of the US Navy Marine Corps and Coast Guard

United States Marine Corps Aircraft Since 1913 E.R. Johnson, Lloyd S. Jones, 2018-04-17 Among the world's military air arms United States Marine Corps Aviation occupies a unique tactical niche As the air component of a combined arms expeditionary force it exists primarily to support Marine combat forces on the ground in their amphibious assault mission From the Banana Wars of the 1920s to the present day War on Terror Marine aviation has undergone a lengthy fine tuning process not only in terms of warfare doctrines and tactics but also in the types of aircraft needed to accomplish the mission This comprehensive survey provides the history technical specifications drawings and photographs of every type of fixed and rotary wing aircraft used by Marine Air from its origins prior to World War I up to current operations

United States Naval Aviation, 1919-1941 E.R. Johnson, 2014-01-10 Within six months of the devastating attack on Pearl Harbor the U S Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original Defeat Germany First strategy That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1 000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation This thorough study with detailed drawings and photographs explains and illustrates the trial and error process which went into developing the aircraft airships and ships of the interwar period The critical factors that shaped Naval Aviation after World War I naval treaties fleet tactics government programs leadership and organization as well as the emergence of Marine Corps and Coast Guard aviation are discussed in depth

American Military Transport Aircraft Since 1925 E.R. Johnson, Lloyd S. Jones, 2013-04-06 Without the support of airlift the modern American military machine would be brought to a standstill Since World War II beginning with the Cold War and continuing up to the present day the U S armed forces have come increasingly to rely upon airlift for mobility The power to rapidly move and thereafter support a military operation anywhere in the world at any time has become a foundational element of American defense policy This work provides the reader with a comprehensive historical survey including technical specifications drawings and photographs of each type of fixed wing aircraft used by U S military forces over a nearly 90 year period to carry out the airlift mission

American Attack Aircraft Since 1926 E.R. Johnson, 2012-05-28 This book provides a concise historical survey of the various types of aircraft used by the United States Army Air Corps Army Air Forces and Air Force and the Navy and Marine Corps to accomplish air attack missions since 1926 The text covers four types of fixed wing aircraft designated attack aircraft light medium and tactical bombers fighter bombers and adapted attack aircraft Reports on individual aircraft types include the aircraft's original military requirements production history and operational record usually accompanied by photographs illustrations and technical specifications Four

appendices detail aircraft designations and nomenclature used throughout the military the organizational structure of various military air units aircraft designs that never made it into official service and the evolution of attack aircraft weapons and tactics

American Flying Boats and Amphibious Aircraft E.R. Johnson,2016-03-29 This work is a comprehensive heavily illustrated history of the many flying boats and amphibious aircraft designed and built in the United States It is divided into three chronological sections the early era 1912 1928 the golden era 1928 1945 and the post war era 1945 present with historical overviews of each period Within each section individual aircraft types are listed in alphabetical order by manufacturer or builder with historical background technical specifications drawings and one or more photographs Appendices cover lesser known flying boat and amphibian types as well as various design concepts that never achieved the flying stage

Dictionary of American Naval Aviation Squadrons Roy A. Grossnick,Naval Historical Center (U.S.),1995

The U.S. Combat Aircraft Industry, 1909-2000 Mark A. Lorell,2003-10-29 Drawing on primary and secondary sources on the aircraft industry this report provides a brief survey of industry structure innovation and competition in the U S fixed wing combat aircraft industry from its earliest days to the present It supports a much larger research effort examining the future of the structure innovation and competition of the U S military aircraft industrial base that responds to congressional concerns about that future
