Women and Family in Contemporary Japan Susan D. Holloway, 2010-05-24 Japanese women have often been singled out for their strong commitment to the role of housewife and mother But they are now postponing marriage and bearing fewer children and Japan has become one of the least fertile and fastest aging countries in the world Why are so many Japanese women opting out of family life To answer this question the author draws on in depth interviews and extensive survey data to examine Japanese mothers perspectives and experiences of marriage parenting and family life The goal is to understand how as introspective self aware individuals these women interpret and respond to the barriers and opportunities afforded within the structural and ideological contexts of contemporary Japan The findings suggest a need for changes in the structure of the workplace and the education system to provide women with the opportunity to find a fulfilling balance of work and family life

family studies women s studies anthropology ethnology and sociology **Single Mothers in Contemporary Japan** Aya Ezawa, 2016-05-12 Combining work and family remains a major challenge for married women in contemporary Japan and it s not uncommon for them to quit working when starting a family Single mothers by contrast almost always work regardless of the age of their children Despite their eagerness to support themselves and their children through employment their average income remains low and many live on a household budget close to the poverty line This book examines how the difficult living conditions facing single mothers in Japan highlight not only the challenges they face in earning a family wage and managing the work family balance but also reveals the class dimensions of family life in contemporary Japan The need to make ends meet with few resources means that mothers may find it difficult to uphold the lifestyle they may consider as most appropriate for the upbringing of their children and that they may have to choose between their presence at home in line with the ideal of the middle class housewife and mother or devoting more time to earning an income that can pay for a good education Social class in this case is not just a matter of education occupation or income but is also expressed by mothers approaches to their children s upbringing and future opportunities in education and employment Based on life history interviews with single mothers this study examines the gendered meanings of social class and social achievement and the role of maternal practices in shaping their children s future life trajectories Women and Politics in Contemporary Japan Emma Dalton, 2015-02-11 This book looks at the gendering of the political system in Japan and the effects of that system on gender equality in national level politics specifically and wider society more generally It examines the approach taken by the long ruling Liberal Democratic Party LDP to issues of gender equality in Japan and the repercussions of that approach on women s political experiences and representation This book covers a range of themes including the role of the LDP and other major political parties in constructing the modern Japanese political system the under representation of women in Japanese politics women s experiences in party politics and the gendering of government policies Using in depth interviews with women members of the national Diet the book sheds light on how political women negotiate the male dominated world of Japanese politics **Promising Practices: Women Volunteers in Contemporary Japanese Religious Civil Society** Paola Cavaliere, 2015-01-27 Based upon a survey of five faith based volunteer groups Promising Practices offers valuable insights and fresh perspectives into the ways women s participation in religious civic organizations may work as a gateway toward participatory democracy By approaching women s faith based volunteering as a social practice the book engages with three of the most important dimensions of civil society gender religion and democracy Cavaliere teases out the complexity of interactions among these three dimensions of civic life through stories of individual women who volunteer for three different religious organizations The volume examines how faith based volunteering is experienced by women in contemporary Japan and how it becomes a site of empowering and disempowering practices through which women balance the benefits and the costs of personal shifts socio economic changes and democratic transformation *Work and Family in Contemporary Japan*
