Understanding Young Childrens Learning Through Play Building Playful Pedagogies:

Understanding Young Children's Learning through Play Pat Broadhead, Andy Burt, 2012-03-12 This timely and accessible text introduces, theorises and practically applies two important concepts which now underpin early years practice: those of playful learning and playful pedagogies. Pat Broadhead and Andy Burt draw upon filmed material, conversations with children, reflection, observation and parental and staff interviews in their longitudinal study of outdoor and indoor play environments in an early years unit. This research-based text offers extensive insights into related theories as well as drawing on the authors' skills and knowledge as researcher and as class teacher in order to provide opportunities for personal reflection and possibilities for practical application in early years classes and settings. Discussing both indoor and outdoor environments, the text explores ideas surrounding open-ended play and the whatever you want it to be place. It illustrates how the themes of children's play reflect their interests, experiences, knowledge gained at home and in school and their cultural heritages. By showing how children become familiar and skilful within open-ended play environments, the authors illustrate how the children's co-operative skills develop over time as they become connected in communities of learners. Alongside the examples of children's playful learning, the book also considers the implications for resourcing and organising playful settings through playful pedagogies that connect with the Early Years Foundation Stage curriculum (DfES 2007) and with the Tickell Review. Ongoing as the book went to press, *Understanding Young Children's Learning through Play* uses children's perspectives on their play to illustrate how rich their personal understandings are. It also includes parental reflections on what may initially appear a risky and unusual outdoor environment and it draws attention to the importance of conflict resolution in play in order to extend children's resilience and assertiveness. This insightful text will be of interest to students of early years education, early years practitioners, academics and researchers.

Playful Pedagogies: Young Children Learning in International and Multicultural Contexts Anna Cox, Estelle Tarry, 2015-05-25 In the 21st century, what the future holds for young learners is unclear; what is clear is that they need to be confident, capable and resilient. As wider communication about education is increasing, there is a developing understanding that children in settings across the globe learn in the same ways and have the same needs. How these are best met, demands, reflection and effective contexts for early learning reflect the needs and demands of the communities they serve. This book considers international and multicultural learning environments from both theoretical and practical perspectives. It is written by specialists in early years education in the UK and in international contexts, all of whom have a passion for young children's learning. The theoretical perspectives are supported by eight case studies from Uganda, Indonesia, Mexico, Qatar, Netherlands, Italy, the United Kingdom and Romania.

Child-Initiated Play and Learning Annie Woods, 2013-03-05 Planning is central to the role of any early years practitioner and involves careful consideration of resources and the learning environment, learning outcomes, observation and assessment and the unique abilities of individual children. This is a big ask and in a busy setting it can be a challenge to adopt

a flexible creative approach to planning that embraces the unexpected rather than relying on templates or existing schemes of work This book takes a fresh look at planning to consider the possibilities that should be encouraged when playing alongside young children It shows how a creative approach that allows for spontaneous adventures in play through child led projects leads to rich learning experiences that build on children s own interests Drawing on practice from Reggio Emilia New Zealand Scandinavia and settings in the UK the book covers all aspects of planning including using observations of children to enable them to lead projects organisation of indoor and outdoor learning environments inclusive practice learning through risk taking and adventure play working with parents and carers encouraging the team to consider different ways of working Including encounters from authentic settings and provocative questions for reflective practice this timely new text aims to give students and practitioners the confidence to adopt a flexible approach to planning that will better meet the needs of the children in their care The authors are experienced lecturers practitioners mentors and assessors Working with students visiting placements training teachers and early years professionals they provide a sense of real purpose in their writing and enjoyment in the themes made explicit throughout this book
