Production of Space Derek Ford, 2016-10-26 Emerging from a radical pedagogical tradition Education and the Production of Space deepens and extends Henri Lefebvre's insights on revolutionary praxis by revealing the intimate relationship between education and the production of space Synthesizing educational theory Marxist theory and critical geography the book articulates a revolutionary political pedagogy one that emerges as a break from within and against critical pedagogy Ford investigates the role of space in the context of emerging social movements and urban rebellions with a focus on the Baltimore Rebellion of 2015 and shows how processes of learning studying and teaching can help us produce space differently in a manner aligned with our needs and desires **Key Texts in Human Geography** Phil Hubbard, Rob

Kitchin, Gill Valentine, 2008-05-19 A book that will delight students Key Texts in Human Geography is a primer of 26 interpretive essays designed to open up the subject's landmark monographs of the past 50 years to critical interpretation The essays are uniformly excellent and the enthusiasm of the authors for the project shines through It will find itself at the top of a thousand module handouts THE Textbook Guide Will surely become a key text itself Read any chapter and you will want to compare it with another Before you realize an afternoon is gone and then you are tracking down the originals Professor James Sidaway University of Plymouth An essential synopsis of essential readings that every human geographer must read It is highly recommended for those just embarking on their careers as well as those who need a reminder of how and why geography moved from the margins of social thought to its very core Barney Warf Florida State University Undergraduate geography students are often directed to key texts in the literature but find them difficult to read because of their language and argument As a result they fail to get to grips with the subject matter and gravitate towards course textbooks instead Key Texts in Human Geography serves as a primer and companion to the key texts in human geography published over the past 40 years It is not a reader but a volume of 26 interpretive essays highlighting the significance of the text how the book should be read reactions and controversies surrounding the book the book's long term legacy It is an essential reference guide for all students of human geography and provides an invaluable interpretive tool in answering questions about human geography

and what constitutes geographical knowledge

Capitalism in the Anthropocene John Bellamy Foster, 2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world's population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current planetary emergency exploring the theoretical historical and practical dimensions of the capitalism's alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope

New Models In Geography Richard Peet, Nigel Thrift, 2013-10-11 First published in 1989 It seems such a long time ago another age yet it is a mere twenty odd years since the original Models in Geography was published It is an even shorter time since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences What came to be called the political economy perspective has progressed with remarkable speed and energy to generate its own framework of conceptualization and analysis its own questions and debates The papers in these two volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach Moreover from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally it has now flowered into a consistent part of enquiries that span the entire realm of social studies

Global Capitalism and the Crisis of Humanity William I. Robinson, 2014-07-28 This book discusses the nature of the new global capitalism the rise of a globalized production and financial system a transnational capitalist class and a transnational state and warns of the rise of a global police state to contain the explosive contradictions of a global capitalist system that is crisis ridden and out of control

Gentrification as a Global Strategy Abel Albet, Núria Benach, 2017-07-14 This book memorializes the work of one of Geography's leading critical thinkers and a public intellectual known world wide Neil Smith It presents a rich collection of insights from leading international and interdisciplinary experts drawing on Neil Smith's ideas for inspiration and debate This book demonstrates the relevance and usefulness
