Unified Theories Of Cognition The William James Lectures:

Unified Theories of Cognition Allen Newell, 1994 Newell introduces Soar an architecture for general cognition A pioneer system in AI Soar is the first problem solver to create its own subgoals and learn continuously from its own experience Its ability to operate within the real time constraints of intelligent behavior illustrates important characteristics of human cognition

Unified Theories of Cognition Allen Newell, 1990 mind one of the great problems of philosophy should also transcend disciplines and attract a large scientific audience

Social Intelligence and Cognitive Assessments of Personality Robert S. Wyer, Jr., Thomas K. Srull, 2013-02-01 This volume presents a new conceptualization of personality and social cognition that addresses both traditional and new issues Written for students of personality experimental and consumer psychology and cognitive science

Mental Models In Cognitive Science Alan Garnham, Jane Oakhill, 2013-06-17 Phil Johnson Laird s theory of mental models has proved to be an influential development in the cognitive sciences This theory aims to provide a detailed account of both reasoning and inference on the one hand and language on the other It can therefore be regarded as a step toward the much sought after unified theory of cognition This book provides an overview of mental models research Some of the contributors were collaborators or former graduate students of Johnson Laird and between them they cover the main strands of mental models theory After an appreciation of Johnson Laird the book covers topics including language Processing Reasoning Inference The Role Of Emotions And The Impact Of mental illnesses on thought processes

Proceedings of the Twenty-first Annual Conference of the Cognitive Science Society Martin Hahn, Scott C. Stoness, 2020-12-22 This book presents the complete collection of peer reviewed presentations at the 1999 Cognitive Science Society meeting including papers poster abstracts and descriptions of conference symposia For students and researchers in all areas of cognitive science

Soar: A Cognitive Architecture in Perspective J.A. Michon, Aladin Akyrürek, 2013-03-12 Soar A Cognitive Architecture in Perspective represents a European perspective on Soar with the exception of the special contribution from Allen Newell arguing for Unified Theories of Cognition The various papers derive from the work of the Soar Research Group that has been active at the University of Groningen The Netherlands since 1987 The work reported here has been inspired in particular by two topics that precipitated the group s interest in Soar in the first place road user behavior and the temporal organization of behavior more specifically planning At the same time the various contributions go well beyond the simple use of Soar as a convenient medium for modeling human cognitive activity In every paper one or more fundamental issues are raised that touch upon the very nature and consistency of Soar as an intelligent architecture As a result the reader will learn about the operator implementation problem chunking multitasking the need to constrain the depth of the goal stack and induction etc Soar is still at a relatively early stage of development It does nevertheless constitute an important breakthrough in the area of computer architectures for general intelligence Soar shows one important direction that future efforts to build intelligent systems should take if they aim for a comprehensive and

psychologically meaningful theory of cognition This is argued in a powerful way by Newell in his contribution to this volume For this reason the Soar system will probably play an important integrative role within cognitive science in bringing together important subdomains of psychology computer science linguistics and the neurosciences Although Soar is not the only architecture for intelligence it is one of the most advanced and theoretically best motivated architectures presently available Soar A Cognitive Architecture in Perspective is of special interest to researchers in the domains of cognitive science computer science and artificial intelligence cognitive psychology and the philosophy of mind

Information, Organisation and Technology Kecheng Liu, Rodney J. Clarke, Peter Bøgh Andersen, Ronald K. Stamper, 2012-12-06 Organisational semiotics is a discipline that is concerned with the interrelationships between individuals and groups and between humans and technology functioning in organisations and society Organisational semiotics opens up the prospect of theory building and the development of new methods and techniques to gain insights into organised behaviour and enacted social practices in the presence and absence of various technologies It shares common interests with many other approaches to information and organisations such as computer science computational semiotics organisational engineering and language action perspective The common vision shared by these approaches is to treat organisations and related information systems and technologies within a unified semiotic framework with particular reference to the huge range of issues that elude many traditional disciplines The analysis and design of information systems develops methods for solving the practical problems but offers no rigorous theoretical foundation for them or how information functions within and between organisations The semiotic perspective accommodates the individual and the social the human and the technical intra and inter organisational interactions at a level of detail that is required in the study modelling design and engineering of new and alternative organisational and technical systems This perspective is outlined in the chapter presentations of Information Organisation and Technology

Explaining Russian-German code-mixing Nikolay Hakimov, 2021 The study of grammatical variation in language mixing has been at the core of research into bilingual language practices Although various motivations have been proposed in the literature to account for possible mixing patterns some of them are either controversial or remain untested Little is still known about whether and how frequency of use of linguistic elements can contribute to the patterning of bilingual talk This book is the first to systematically explore the factor usage frequency in a corpus of bilingual speech The two aims are i to describe and analyze the variation in mixing patterns in the speech of Russia German adolescents and young adults in Germany and ii to propose and test usage based explanations of variation in mixing patterns in three morphosyntactic contexts the adjective modified noun phrase the prepositional phrase and the plural marking of German noun insertions in bilingual sentences In these contexts German noun insertions combine with either Russian or German words and grammatical markers thus yielding mixed bilingual and German monolingual constituents in otherwise Russian sentences the latter also labelled as embedded language islands The results suggest that the frequency with which words are

used together mediates the distribution of mixing patterns in each of the examined contexts The differing impacts of co occurrence frequency are attributed to the distributional and semantic specifics of the analyzed morphosyntactic configurations Lexical frequency has been found to be another important determinant in this variation Other factors include recency or lexical priming in discourse in the case of prepositional phrases and phonological and structural similarities and differences in the inflectional systems of the contact languages in the case of plural marking
