Walter Benjamin's Antifascist Education Tyson E. Lewis, 2020-02-01 Walter Benjamin's Antifascist Education is the first comprehensive analysis of educational themes across the entirety of the critical theorist's diverse writings Starting with Benjamin's early reflections on teaching and learning Tyson E Lewis argues that the aesthetic and cultural forms to which Benjamin so often turned namely radio broadcasts children's theatrical productions collections cityscapes public cinemas and word games swell with educational potentialities What emerges from Lewis's reading is a constellational curriculum composed of minor practices such as poor teaching absentminded learning and nondurational studying This curriculum carries political significance offering an antidote to past and present forms of fascist manipulation hardness and coldness Walter Benjamin's Antifascist Education is a testimony to Benjamin's belief that everyone is an educator and everyone needs to be educated and everything is education

Totalitarian Space and the Destruction of Aura Saladdin Ahmed, 2019-02-14 Diagnoses our contemporary spatial experience as fundamentally totalitarian through a multilayered critical theory of space We live today within a system in which state and corporate power aim to render space flat transparent and uniform for only then can it be truly controlled The gaze of power and the commodity form are capable of infiltrating even the darkest of corners and often we invite them into our most private spaces We do so as a matter of convenience but also to placate ourselves and cope with the alienation inherent in our everyday lives The resulting dominant space can best be termed totalitarian It is space stripped of uniqueness deprived of the spatial aura necessary for authentic experience In *Totalitarian Space and the Destruction of Aura* Saladdin Ahmed sets out to help us grasp what has been lost before no trace remains He draws attention to that which we might prefer not to see but despite the bleakness of this indictment of reality the book also offers a message of hope Namely it is only once we comprehend the magnitude of the threat to our spatial experience and our own complicity in sustaining this system that we can begin to resist the totalizing forces at work This is a clear and important contribution to the existing literature and contemporary political thought in general It expounds upon Benjamin's analysis of the aura in his famous essay *Art in the Age of Mechanical Reproduction* and importantly illustrates how this concept is incredibly pertinent to our society today Mary Caputi author of *Feminism and Power The Need for Critical Theory*

employment of various types of primary source material correspondence manuscripts and drafts memoirs and production notes reading notes and marginalia and all manner of useful contextualising sources like news reports or judicial records While having much to say to literary criticism more broadly this volume is closely focused upon key modernist figures and emergent themes in light of the discipline's archival turn termed in a unifying introduction archivalism An essential ingredient separating the above recent tendency from a much older and better established new historicism in modernist studies at least is that the literary canon remains an important starting point Whereas new historicism is interested in history as represented and recorded in written documents and tends toward a parallel study of literature and non literary texts archival criticism tends toward recognised oftentimes canonical or critically lauded writers presented in Part 1 Sidestepping the vicissitudes of canon formation manuscript scholars tend to gravitate toward leading modernist authors James Joyce Ezra Pound Virginia Woolf Gertrude Stein T S Eliot and Samuel Beckett Part of the reason is obvious known authors frequently leave behind sizeable literary estates which are then acquired by research centres A second section then applies the same empirical methodology to key or emergent themes in the study of modernism including queer modernism spatial modernism little magazines and online finding aids structuring them and the role of faith and or emotions in the construction of modernism as we know it

The Palgrave Handbook of Literature and the City Jeremy Tambling, 2017-02-17 This book is about the impact of literature upon cities world wide and cities upon literature It examines why the city matters so much to contemporary critical theory and why it has inspired so many forms of writing which have attempted to deal with its challenges to think about it and to represent it Gathering together 40 contributors who look at different modes of writing and film making in throughout the world this handbook asks how the modern city has engendered so much theoretical consideration and looks at cities and their literature from China to Peru from New York to Paris from London to Kinshasa It looks at some of the ways in which modern cities whether capitals shanty towns industrial or rust belt have forced themselves on people's ways of thinking and writing

Hobohemia and the Crucifixion Machine Todd McCallum, 2014-12-28 In the early years of the Great Depression thousands of unemployed homeless transients settled into Vancouver's hobo jungle The jungle operated as a distinct community in which goods were exchanged and shared directly without benefit of currency The organization of life was immediate and consensual conducted in the absence of capital accumulation But as the transients moved from the jungles to the city they made innumerable demands on Vancouver's Relief Department consuming financial resources at a rate that threatened the city with bankruptcy In response the municipality instituted a card control system no longer offering relief recipients currency to do with as they chose It also implemented new investigative and assessment procedures including office spies to weed out organizational inefficiencies McCallum argues that threatened by this ungovernable society Vancouver's Relief Department employed Fordist management methods that ultimately stripped the transients of their individuality Vancouver's municipal government entered into contractual relationships with dozens of private businesses

tendering bids for meals in much the same fashion as for printing jobs and construction projects As a result entrepreneurs clamoured to get their share of the state spending With the emergence of work relief camps the provincial government harnessed the only currency that homeless men possessed their muscle This new form of unfree labour aided the province in developing its tourist driven image economy as well as facilitating the transportation of natural resources and manufactured goods It also led eventually to the most significant protest movement of 1930s Canada the On to Ottawa Trek Hobohemia and the Crucifixion Machine explores the connections between the history of transiency and that of Fordism offering a new interpretation of the economic and political crises that wracked Canada in the early years of the Great Depression

The Message is Murder Jonathan Beller, 2017-11-20 Written as a wake up call to the field of media studies The Message is Murder analyses the violence bound up in the everyday functions of digital media At its core is the concept of computational capital the idea that capitalism itself is a computer turning qualities into quantities and that the rise of digital culture and technologies under capitalism should be seen as an extension of capitalism's bloody logic Engaging with Borges Turing Claude Shannon Hitchcock and Marx this book tracks computational capital to reveal the lineages of capitalised power as it has restructured representation consciousness and survival in the twentieth and twenty first centuries It argues that the global intensification of inequality relies on the discursive informatic and screen mediated production of social difference Ultimately The Message is Murder makes the case for recognising media communications across all platforms books films videos photographs and even language itself as technologies of political economy entangled with the social contexts of a capitalism that is inherently racial gendered and genocidal

Baroque Naturalism in Benjamin and Deleuze Tim Flanagan, 2021-10-18 This book itself a study of two books on the Baroque proposes a pair of related theses one interpretive the other argumentative The first enveloped in the second holds that the significance of allegory Gilles Deleuze recognized in Walter Benjamin's 1928 monograph on seventeenth century drama is itself attested in key aspects of Kantian Leibnizian and Platonic philosophy to wit in the respective forms by which thought is phrased predicated and proposed The second enveloping the first is a literalist claim about predication itself namely that the aesthetics of agitation and hallucination so

emblematic of the Baroque sensibility as attested in its emblem books adduces an avowedly metaphysical naturalism in which thought is replete with predicates Oriented by Barbara Cassin's development of the concerted sense in which homonyms are critically distinct from synonyms the philosophical claim here is that the Baroque names the intervallic relation that thought establishes between things On this account any subject finds its unity in a concerted state of disquiet a state rempli in which phenomenologically speaking experience comprises as much seeing as reading as St Jerome encountering Origen's Hexapla

Toy Theory Seth Giddings, 2024-11-05 A novel interpretation of the history and theory of technology from the perspective of toys play and play objects Toy Theory addresses the relationships between toys and technology in two distinct but overlapping ways first as underexamined cultural artifacts and behaviors with significant technical attributes and second as playful and toylike dimensions of technology at large Seth Giddings sets out a toy theory of technology that emphasizes the speculative experimental and noninstrumental in technological paradigms and argues that children's playthings rather than being the most ephemeral and inconsequential of technical devices instead offer analytical and anthropological resources for understanding the materiality and imaginaries of technology over time After defining toy theory in general and conceptual terms Giddings examines different types of toys to explore shifting relationships between the microcosmic symbolic or mimetic content material and technical constitution and modes of play of toys and toy related artifacts on the one hand and prevailing macrocosmic technological paradigms and imaginaries on the other Taking a broad historical and genealogical view Giddings traces contemporary postdigital toy and play culture to precedents from the neolithic through to the Enlightenment to consumer culture from the early nineteenth century to the present day

On Surface and Place Peta Carlin, 2018-03-21 On Surface and Place is a rich and poetic exploration of surfaces which foregrounds their significance in our understanding and experience of place Adopting weaving as its overarching metaphor it departs from Gottfried Semper's discussion of correspondences between architecture and textiles and emerges from the reading of photographs a swatch of Harris Tweed and curtain wall facade juxtaposed In juxtaposing the fabric of the city with the weave of Harris Tweed the book charts an original course across a range of connected ideas and questions combining many different themes writers and disciplines It presents integrated and innovative rethinkings on a number of fundamental relationships including correlations between body and building word and image and between the rural and the metropolitan and the hand crafted and the mass reproduced In doing so it seeks to foreground the very interrelationship of surface and place as it makes a claim for the relational nature of the world in which we live

Walter Benjamin and the Critique of Political Economy Duy Lap Nguyen, 2022-07-14 Exploring the connections between Walter Benjamin's philosophy of history and a Marxian Critique of Political Economy Duy Lap Nguyen analyses Benjamin's early writings and their development into a distinct understanding of historical materialism Benjamin's historically materialist conception of history is shown to be characterised by a focus on the religion of capitalism the mythology of the state and messianic time Revealing these factors Nguyen joins up Benjamin's philosophical critique of the Kantian conception of history alongside the historical trajectory of capitalism he subscribed to Influenced by the theory of fascism outlined by German Marxist theorist Karl Korsch we see how Benjamin's own theory of revolution and redemption in capitalist society developed into a sophisticated critique Essential to Benjamin's materialist critique was a recognition of the fallibility of the Enlightenment notion of progress as well as the need to overturn the political and economic catastrophes which enable capitalism and fascism to thrive In mapping the exact course of Benjamin's critical historical materialism Nguyen fully explicates the unique contribution he made to western Marxism
