Atlas of Optical Coherence Tomography of Macular Diseases Vishali Gupta,Amod Gupta,Mangat R. Dogra,2004-11-12 The emergence of Optical Coherence Tomography OCT in recent years has revolutionized the way we see the retina Providing in real time high resolution cross sectional images of the macula that are very similar to obtaining in vivo histopathological specimens OCT represents a major advance in the diagnostics of retinal disease The excitement of working with this new tool has been dampened by the non availability of any standard textbook on the subject and meant that every new finding on the OCT saw us rushing to the library almost on a daily basis to locate any published reports on the subject Until now Containing nearly 900 scans of both normal and diseased appearances most in full color Atlas of Optical Coherence Tomography of Macular Diseases covers how to use Stratus OCT for diagnosing various macular disorders identifying correct therapeutic approaches and monitoring the responses to therapies and interventions The authors provide brief case summaries fundus photographs fluorescein angiography and the OCT images and the follow up images They discuss OCT applications for diagnosis management and follow up in diabetic macular edema macular hole taut posterior hyaloid membrane vitreofoveal traction idiopathic central serous chorioretinoplasty submacular pathology and more

Optical Coherence Tomography Samuel Boyd,Rosario Brancato,Bradley Straatsma,2011-04 Optical Coherence Tomography Atlas and Text covers the multiple uses and interpretation of OCT and its various applications in ophthalmology related to the posterior segment and the retina The book presents the diagnosis and management of glaucoma age related macular degeneration the integration of OCT and fluorescein angiography and the diagnosis and management of ocular tumors

A Handbook of Ophthalmic Standards and Procedures Lynn Ring,Miriam Okoro,2016-09-20 This handbook of ophthalmic nursing standards and procedures has been developed to assist healthcare professionals working in a wide range of ophthalmic settings and also to provide the patient with safe and consistent ophthalmic nursing care Ophthalmic care is constantly changing and progressing with new technical roles being introduced all the time The authors discovered within their own unit that new healthcare professionals both registered and non registered were often shown slightly different ways of doing things by more experienced members of the team which led to

confusion They felt it was a bit like driving bad habits can easily slip into everyday practice For this reason they developed standards of care to act as a benchmark for the ophthalmic practitioner Written in response to a widely expressed need for greater clarity and consistency this highly regarded book offers a comprehensive one stop resource for all ophthalmic practitioners whether they are registered nurses healthcare assistants or ophthalmic technicians This new edition has been revised to make the text even clearer and bring all the guidance up to date covering communication visual acuity testing ocular medications the ophthalmic outpatient department biometry the ophthalmic accident and emergency department the slit lamp and tonometry additional standards using specific equipment and suggested documentation for providing evidence of development and competence Sections include Communication Visual Acuity Testing Ocular Medications The Ophthalmic Outpatient Department Biometry The Ophthalmic Accident and Emergency Department Slit Lamp and Tonometry Additional Standards Using Specific Equipment Next Steps Using Standards Image Processing in Optical Coherence Tomography Using Matlab Robert Koprowski,Zygmunt Wróbel,2011 This book covers the results of the creation of methods for ophthalmologists support in OCT images automated analysis These methods like the application developed on their basis are used during routine examinations carried out in hospital The monograph comprises proposals of new and also of known algorithms modified by authors for image analysis and processing presented on the basis of example of Matlab environment with Image Processing tools The results are not only obtained fully automatically but also repeatable providing doctors with quantitative information on the degree of pathology occurring in the patient In this case the anterior and posterior eye segment is analysed e g the measurement of the filtration angle or individual layers thickness To introduce the Readers to subtleties related to the implementation of selected fragments of algorithms the notation of some of them in the Matlab environment has been given The presented source code is shown only in the form of example of implementable selected algorithm In no way we impose here the method of resolution on the Reader and we only provide the confirmation of a possibility of its practical implementation *Oxford Handbook of Ophthalmology* Alastair K.
