The first is to generate evidence regarding what design is in STEM education. For example, is the ability to design a singular or manifold construct? Is the capacity to design or are factors of this ability both learnable and teachable? How transferable is designerly knowledge between contexts? How do different disciplinary contexts influence the interpretation of design? The second is to further our understanding of how best to incorporate design within STEM education contexts. For example, how much emphasis should be placed on learning to or through design in school? How should design be assessed within formal education? Where and when is design best incorporated into education? In posing these questions, the goal of this research topic is to provide scholarly discourse which supports critical reflection and the challenging of assumptions regarding design in education.

Proceeding of the 3rd International Conference on Social Knowledge Sciences and Education (ICSKSE) 2023 "Change and Continuity in Southeast Asia" Aditya Nugroho Widiadi, Sharina Osman, Idris Idris, Azmil Mohd Tayeb, 2023-12-26. This is an open access book. Socio-culturally, people in the Southeast Asian region have a heterogeneous composition. This diversity can be seen from the large number of ethnic compositions that inhabit the region. For example, in Indonesia, there are already various ethnic groups, not yet to mention in other regions such as Malaysia, Philippines, and others. The diversity of these ethnic groups is directly proportional to the variety of languages that exist in Southeast Asia. Similarly, with the languages, the culture in these ethnic groups is definitely diverse. Interestingly, this diversity is constantly changing, keeping up with the global changes. These changes are important to study in order to get an overview of the socio-cultural changes and continuity that currently exist in the Southeast Asian region. The various changes and continuity that occur historically, geographically, and socio-culturally mentioned above will also have various impacts on the educational aspect. Therefore, it is also pivotal to examine the various change and continuity that occur in the field of education of Southeast Asia. This is because the field of education will determine where Southeast Asia will be taken in the future.
