Why Greatness Cannot Be Planned The Myth Of The Objective:

Why Greatness Cannot Be Planned Kenneth O. Stanley, Joel Lehman, 2015-05-05 Why does modern life revolve around objectives From how science is funded to improving how children are educated and nearly everything in between our society has become obsessed with a seductive illusion that greatness results from doggedly measuring improvement in the relentless pursuit of an ambitious goal In *Why Greatness Cannot Be Planned* Stanley and Lehman begin with a surprising scientific discovery in artificial intelligence that leads ultimately to the conclusion that the objective obsession has gone too far They make the case that great achievement can't be bottled up into mechanical metrics that innovation is not driven by narrowly focused heroic effort and that we would be wiser and the outcomes better if instead we whole heartedly embraced serendipitous discovery and playful creativity Controversial at its heart yet refreshingly provocative this book challenges readers to consider life without a destination and discovery without a compass [Understanding the Military Design](#)

[Movement](#) Ben Zweibelson, 2023-06-09 This book explains the history and development of the military design movement featuring case studies from key modern militaries Written by a practitioner the work shows how modern militaries think and arrange actions in time and space for security affairs and why designers are disrupting challenging and reconceptualizing everything previously upheld as sacred on the battlefield It is the first book to thoroughly explain what military design is where it came from and how it works at deep philosophically grounded levels and why it is potentially the most controversial development in generations of war fighters The work explains the tangled origins of commercial design and that of designing modern warfare the rise of various design movements and how today's military forces largely hold to a Newtonian stylization built upon mimicry of natural science infused with earlier medieval and religious inspirations Why does our species conceptualize war as such and how do military institutions erect barriers that become so powerful that efforts to design further innovation require entirely novel constructs outside the orthodoxy The book explains design stories from the Israel Defense Force the US Army the US Marine Corps the Canadian Armed Forces and the Australian Defence Force for the first time and includes the theory doctrine organizational culture and key actors involved Ultimately this book is about how small communities of practice are challenging the foundations of modern defence thinking This book will be of much interest to students of military and strategic studies defence studies and security studies as well as design educators and military professionals

Conflicting Models for the Origin of Life Stoyan K. Smoukov, Joseph Seckbach, Richard Gordon, 2023-03-14

Conflicting Models for the Origin of Life provides a forum to compare and contrast the many hypotheses that have been put forward to explain the origin of life There is a revolution brewing in the field of Origin of Life in the process of trying to figure out how Life started many researchers believe there is an impending second creation of life not necessarily biological Up to date understanding is needed to prepare us for the technological and societal changes it would bring Schrodinger s 1944 What is life included the insight of an information carrier which inspired the discovery of the structure of DNA In Conflicting Models of the Origin of Life a selection of the world s experts are brought together to cover different aspects of the research from progress towards synthetic life artificial cells and sub cellular components to new definitions of life and the unexpected places life could have emerge d Chapters also cover fundamental questions of how memory could emerge from memoryless processes and how we can tell if a molecule may have emerged from life Similarly cutting edge research discusses plausible reactions for the emergence of life both on Earth and on exoplanets Additional perspectives from geologists philosophers and even roboticists thinking about the origin of life round out this volume The text is a state of the art snapshot of the latest developments on the emergence of life to be used both in graduate classes and by citizen scientists Audience Researchers in any area of astrobiology as well as others interested in the origins of life will find a modern and current review of the field and the current debates and obstacles This book will clearly illustrate the current state of the art and engage the imagination and creativity of experts across many disciplines

Computational Intelligence in Music, Sound, Art and Design João Correia, Vic Ciesielski, Antonios Liapis, 2017-04-03 This book constitutes the refereed proceedings of the 6th International Conference on Evolutionary Computation in Combinatorial Optimization EvoMUSART 2017 held in Amsterdam The Netherlands in April 2017 co located with the Evo 2017 events EuroGP EvoCOP and EvoApplications The 24 revised full papers presented were carefully reviewed and selected from 29 submissions The papers cover a wide range of topics and application areas including generative approaches to music graphics game content and narrative music information retrieval computational aesthetics the mechanics of interactive evolutionary computation computer aided design and the art theory of evolutionary computation

Deep Swarm and Evolution for Generative Artificial Intelligence Hitoshi Iba, 2025-07-29 This book provides theoretical and practical knowledge about swarm and evolutionary approach of generative AI and Large Language Models LLMs The development of such tools contributes to better optimizing methodologies with the integration of several machinelearning and deep learning techniques In particular it discusses how the emergence concept can contribute to the improvement of AI The book aims to model human cognitive function in terms of emergence and to explain the feasibility of AI To this end it focuses on human

perceptions of utility It describes the emergence of various cognitive errors and irrational behaviours in the multiobjective situations It also reviews the cognitive differences and similarities between humans and LLMs Such studies are important when applying LLMs to real world tasks that involve human cognition e g financial engineering and market issues The book describes the intelligent behaviour of living organisms This is to clarify how to achieve AI in the direction of artificial life It describes sexual selection which is a well known natural phenomenon that troubled Darwin i e why evolutionarily useless items evolved such as peacock feathers and moose antlers etc The book shows how sexual selection is extended as novelty search for the application of generative AI i e the image generation with diffusion model Real world applications are emphasised Empirical examples from real world data show how the concept of deep swarm and evolution is successfully applied when addressing tasks from such recent fields as robotics e commerce Web Shop and image generation etc

Artificial Intelligence and Exponential Technologies: Business Models Evolution and New Investment

Opportunities Francesco Corea, 2017-01-11 Artificial Intelligence is a huge breakthrough technology that is changing our world It requires some degrees of technical skills to be developed and understood so in this book we are going to first of all define AI and categorize it with a non technical language We will explain how we reached this phase and what historically happened to artificial intelligence in the last century Recent advancements in machine learning neuroscience and artificial intelligence technology will be addressed and new business models introduced for and by artificial intelligence research will be analyzed Finally we will describe the investment landscape through the quite comprehensive study of almost 14 000 AI companies and we will discuss important features and characteristics of both AI investors as well as investments This is the Internet of Things era AI is revolutionizing the world we live in It is augmenting the human experiences and it targets to amplify human intelligence in a future not so distant from today Although AI can change our lives it comes also with some responsibilities We need to start thinking about how to properly design an AI engine for specific purposes as well as how to control it and perhaps switch it off if needed And above all we need to start trusting our technology and its ability to reach an effective and smart decision
