Holmqvist-Jonsäter, Christopher Coker, 2009-12-04 This edited volume addresses the relationship between the essential nature of war and its character at the beginning of the twenty first century The focus is on the conflicts in Iraq and Afghanistan situations that occupy a central role in international affairs and that have become highly influential in thinking about war in the widest sense The intellectual foundation of the volume is Clausewitz's insight that though war has an enduring nature its character changes with time space social structure and culture The fact that war's character varies means that different actors may interpret experience and ultimately wage war differently The conflict between the ways that war is conceptualised in the prevailing Western and international discourse and the manner in which it plays out on the ground is a key discussion point for scholars and practitioners in the field of international relations Contributions combine insights from social theory philosophy sociology and strategic studies and ask directly what contemporary war is and what the implications are for the future This book will be of much interest to students of war studies strategic studies security studies and IR in general Caroline Holmqvist-Jonsäter is currently completing a PhD in the conflation of war and policing in

*The Evolution of Operational Art* John Andreas Olsen, Martin van Creveld, 2010-11-04 Broadly defined as the grey area between strategy and tactics operational art spans the theory and practice of planning and conducting campaigns and major operations aimed at accomplishing strategic and operational objectives in a given theatre of operations An intermediate link between strategy and tactics has always existed but a distinct concept that encompasses a systematic and deliberate plan of campaign for major operations is a mere two hundred years old Based on country specific case studies this book describes how the concepts that underpin operational art originated how they received practical expression in various campaigns and how they developed over time The point of departure is the campaigns of the God of War Napoleon Bonaparte The book then proceeds with chapters on the evolution of operational art in Prussia Germany the Soviet Union Russia the United Kingdom United States Israel and China The final chapter deals with the future of operational art in irregular warfare Theory is critical to refining and improving existing methods of applying operational warfare and its importance cannot be overstated however to be useful theory and its accompanying vocabulary must be combined with a proper examination of historical trends and practical experience The present volume attempts to achieve that combination This book is a project of the Oxford Leverhulme Programme on the Changing Character of War
