Disrupting the Digital Humanities Dorothy Kim, Jesse Stommel, 2018 All too often defining a discipline becomes more an exercise of exclusion than inclusion Disrupting the Digital Humanities seeks to rethink how we map disciplinary terrain by directly confronting the gatekeeping impulse of many other so called field defining collections What is most beautiful about the work of the Digital Humanities is exactly the fact that it can't be tidily anthologized In fact the desire to neatly define the Digital Humanities to filter the DH y from the DH is a way of excluding the radically diverse work that actually constitutes the field This collection then works to push and prod at the edges of the Digital Humanities to open the Digital Humanities rather than close it down Ultimately it's exactly the fringes the outliers that make the Digital Humanities both lovely and rigorous This collection does not constitute yet another reservoir for the new Digital Humanities canon Rather our aim is less about assembling content as it is about creating new conversations Building a truly communal space for the digital humanities requires that we all approach that space with a commitment to 1 creating open and non hierarchical dialogues 2 championing non traditional work that might not otherwise be recognized through conventional scholarly channels 3 amplifying marginalized voices 4 advocating for students and learners and 5 sharing generously to support the work of our peers

Bits and Bricks: Digitalisierung von Geschäftsmodellen in der Immobilienbranche Andreas Moring, Lukas Maiwald, Timo Kewitz, 2018-01-08. Die Digitalisierung wird auch die Immobilienwirtschaft maßgeblich verändern, darin sind sich die Experten einig. Doch noch kann niemand genau vorhersehen, welche Veränderungen konkret auf die Unternehmen zukommen werden. Dieses Buch versteht sich als Wegweiser für dieses komplexe Thema. Ausführlich beschreiben die Autoren mögliche Auswirkungen der Digitalisierung auf die Geschäftsmodelle von Bauunternehmen, Immobilienmaklern und Projektentwicklern im Immobilienmarkt. Sie schildern, welche Veränderungen der Wertschöpfungskette durch die Digitalisierung des Baugewerbes zu erwarten sind. Das Building Information Modeling, eine softwarebasierte Methode zur optimierten Planung, Ausführung und Bewirtschaftung von Gebäuden, ist nur eines der vielen neuen und digitalen Handlungsfelder im Baugewerbe der Zukunft. Auch die Immobilienvermittlung wird vom digitalen Wandel betroffen sein. Neben einer Analyse der digitalen Trends in der Immobilienvermittlung geben die Autoren außerdem zahlreiche Handlungsempfehlungen für die Projektentwicklung im Bau- und Immobiliensektor. Das Buch zeigt, dass alle Wertschöpfungsketten in der Immobilienwirtschaft von verschiedenen Trends und Technologien betroffen sind und teilweise sogar ganze Bereiche wegfallen. Die Effekte werden schneller zu spüren sein, als es den meisten Unternehmen der doch eher langfristig denkenden und handelnden Branche bewusst ist. Wer die Auswirkungen und deren Folgen jetzt schon analysieren und abschätzen kann, stellt sich heute richtig auf für die Entwicklungen und Umwälzungen in den kommenden Jahren. Ein Buch für alle Vor- und Querdenker der Branche, die sich den Herausforderungen einer digitalen Immobilienwirtschaft aktiv stellen wollen.

Reimagining the Academic Library David W. Lewis, 2016-05-04 Academic libraries are in the midst of significant disruption. Academic librarians and university administrators know they need to change, but are not sure how. Bits and pieces of what needs to happen are clear, but the whole picture is hard to grasp. Reimagining the Academic Library paints a simple, straightforward picture of the changes affecting academic libraries and what academic librarians need to do to respond to the changes would help to guide future library practice. The aim is to explain where academic libraries need to go and how to get there in a book that can be read in a weekend. David Lewis provides a readable survey of the current state of academic library practice and proposes where academic libraries need to go in the future to provide value to their campuses. His primary focus is on collections, as this is the area with the greatest opportunity for change and is the driver of most library cost. Lewis provides an accessible framework for thinking about how library practice needs to adjust in the digital environment. The book will be useful not only to academic librarians but also for librarians to share with presidents and provosts who are a concise source for understanding
