Hakan DÜZGÖREN, Plan your software license. Choose a license server model, select network servers and check the system requirements for Network License Manager. Overview of license types. Administrators manage three types of licenses according to the subscription type. These license types are authenticated differently. Named user licenses based on the customer's Autodesk Account are automatically authenticated when the customer first runs a product after signing in to Autodesk Account. Standalone licenses are tied to specific devices and use serial numbers. When customers first run the product, standalone licenses are authenticated either silently by Autodesk servers or when customers are prompted to enter a serial number. Network licenses managed with Network License Manager (NLM) software are authenticated by pre-configured network license servers. Sometimes customers may be asked to give license server information when they first run a product.

You can identify your license type for each product in the Products and Services section of Autodesk Account
