SERVICE INFORMATION

GENERAL

CAUTION

- Gasoline is extremely flammable and is explosive under certain conditions. KEEP OUT OF REACH OF CHILDREN.
- If the engine used for cleaning or air conditioning, make sure the area is well ventilated. Never use the engine in an enclosed area. The exhaust system produces carbon monoxide gas that has more than 100 times the toxicity of carbon dioxide and may lead to death. Use the engine in an open area or with an exhaust extraction system in an enclosed area.
- Smoking or welding the exhaust system will impact normal operation and could cause the engine to stall or back, resulting in loss of vehicle control.
- Work in a well-ventilated area. Smoking or allowing flames or sparks in the work area or where gasoline is stored can cause a fire or explosion.

CAUTION

- Be sure to remove the dipstick before starting or hot fuel passages will be compressed air. The dipstick might be damaged.

NOTE

- If the vehicle is to be stored for more than one month, drain the fuel chamber. Fuel left in the fuel chamber may cause clogged jets resulting in hard starting or poor drivability.
- Before disassembling the carburetor, place an inverted gasoline container under the carburetor drain screw, loosen the screw and drain the carburetor.
- When disassembling the fuel system parts, note the locations of the O-rings. Replace them with new ones on reassembly.
- After removing the carburetor, wrap the intake part of the engine with a shop towel or cover it with a piece of tape to prevent any foreign material from dropping into the engine. Be sure to remove the cover when re-installing the carburetor.
