Governing (Through) Rights Bal Sokhi-Bulley, 2016-09-22 Taking a critical attitude of dissatisfaction towards rights the central premise of this book is that rights are technologies of governmentality They are a regulating discourse that is itself managed through governing tactics and techniques hence governing through rights Part I examines the problem of government through rights The opening chapter describes governmentality as a methodology that is then used to interrogate the relationship between rights and governance in three

contexts the international regional and local How rights regulate certain identities and conceptions of what is good governance is examined through the case study of non state actors specifically the NGO in the international setting through a case study of rights agencies and the role of experts indicators and the rights based approach in the European Union or regional setting and in terms of the local the challenge that the blossoming language of responsibility and community poses to rights in the name of less government Big Society is problematised In Part II on resisting government through rights the book also asks what counter conducts are possible using rights language questioning rioting as resistance and whether counter conduct can be read as an ethos of the political rights bearing subject and as a new ethical right Thus the book bridges a divide between critical theory ie Foucauldian understandings of power as governmentality and human rights law

Human Rights Indicators in Development Siobhan

McInerney-Lankford, Hans-Otto Sano, 2010-10-26 Human rights indicators are central to the application of human rights standards in context and relate essentially to measuring human rights realization both qualitatively and quantitatively They offer an empirical or evidence based dimension to the normative content of human rights legal obligations and a provide means of connecting those obligations with empirical data and evidence and in this way relate to human rights accountability and the enforcement of human rights obligations Human rights indicators are important both for assessment and diagnostic purposes the assessment function of human rights indicators relates to their use in monitoring accountability effectiveness and impact while the diagnostic purposes relates to measuring the current state of human rights implementation and enjoyment in a given context whether regional country specific or local This paper offers a preliminary review of the foregoing in the development context and a general perspective on the significance of human rights indicators for development processes and outcomes It is not intended to be prescriptive and does not provide specific operational

recommendations on the use of human rights indicators in development projects Nor does it advocate a particular approach or mode of integrating human rights in development or argue for a rights based approach to development This paper is designed to provide development practitioners with a preliminary view on the possible relevance design and use of human rights indicators in development policy and practice It also introduces a basic conceptual framework about the relationship between rights and development including in the World Bank context and surveys a range of methodological approaches on human rights measurement exploring in general terms different types of human rights indicators and their potential implications for development at three different levels of convergence or integration

Conceptualising Comparative Politics Anthony Petros Spanakos, Francisco Panizza, 2015-07-16 Comparative politics often involves testing of hypotheses using new methodological approaches without giving sufficient attention to the concepts which are fundamental to hypotheses particularly the ability of these concepts to travel Proper operationalising requires deep reflection on the concept not simply establishing how it should be measured Conceptualising Comparative Politics the flagship book of Routledge's series of the same name breaks new ground by emphasising the role of thoroughly thinking through concepts and deep familiarity with the case that inform the conceptual reflection In this thought provoking book established academics as well as emerging scholars in the field collect and invite scholarship in the tradition of conceptual comparative politics The book posits that concepts may be used comparatively as lenses building blocks and scripts and contributors show how these conceptual tools can be employed in original comparative research Importantly contributors to Conceptualising Comparative Politics do not simply use concepts in one of these three ways but they apply them with careful consideration of empirical variation The chapters included in this volume address some of the most contentious issues in comparative politics populism state capacity governance institutions elections secularism among others from various geographic regions and model how scholars doing comparative politics might approach such subjects Concepts make possible scholarly conversations including creative confrontations across paradigms Conceptualising Comparative Politics will challenge you to think of how to engage in conceptual comparative inquiry and how to use various methodologically sound techniques to understand and explain comparative politics

The SAGE Handbook of Human Rights Anja Mihr, Mark Gibney, 2014-07-21 The SAGE Handbook of Human Rights will comprise a two volume set consisting of more than 50 original chapters that clarify and analyze human rights issues of both contemporary and future importance The Handbook will take an interdisciplinary approach combining work in such traditional fields as law political science and philosophy with such non traditional subjects as climate change demography economics geography urban studies mass communication and business and marketing In addition one of the aspects of mainstreaming is the manner in which human rights has come to play a prominent role in popular culture and there will be a section on human rights in art film music and literature Not only will the Handbook provide a state of the art analysis of the discipline that addresses the history and development of human rights standards and its movements

mechanisms and institutions but it will seek to go beyond this and produce a book that will help lead to prospective thinking

A Global Political Economy of Democratisation Alison J. Ayers, 2018-02-13 The late twentieth century is often portrayed as an Age of Democratisation with democracy heralded as the best of all political systems Yet democracy has multiple meanings values and significances The start of the twenty first century has witnessed a massive revival of interest in the meaning and role of democracy not least as democracy understood in one highly particular sense has been increasingly recognised to be in crisis This book presents these deliberations in a new light by moving beyond the concept of the sovereign state as the dominant framework of enquiry and by rejecting the primacy of the state and the categorical separation of the domestic and the international Instead Ayers elaborates an account of democratisation through the global political economy encompassing a trenchant critique of mainstream democracy promotion in theory and practice and opening up possibilities for different histories of democratisation autonomous of the Western liberal and neoliberal project This innovative work will prove useful to scholars and students in the fields of Politics Political Economy International Relations Development African Studies History Geography and Sociology

The Transformation of Capacity in International Development Avidah K. Mayville, 2019-11-30 The Transformation of Capacity in International Development exposes the transformation of capacity within the development discourse through a discursive analysis of USAID projects in Afghanistan and Pakistan between 1977 and 2017 As development agendas increasingly call for human rights approaches to development and the foreign policies of donor states sound alarms over global security threats capacity development has emerged as the solution to the complex problem of development Through this examination of USAID's attempts to build capacity in Afghanistan and Pakistan the book exposes how Western notions of progress constructed by institutions government officials scholars and private sector actors are obscured by the transformation of capacity As agendas are translated into projects they perpetuate historical relationships of global inequality that have corrupted and compete with indigenous models of governance The Transformation of Capacity in International Development has implications for those considering the future of human rights based approaches to development the international management of global security threats and the sustainability of donor investments

International Democracy and the West Richard Youngs,2004-11-04 This book adds to debates over the international dimensions of democratic change by studying the policies and actions of three sets of Western actors namely governments multinational companies and international NGOs This actor based triangular approach responds to observations that the strategic economic and social aspects of international democracy have rarely been studied in a combined holistic fashion During the 1990s Western governments multinational companies and civil society organizations all came to engage more notably in debates over democratic trends But were they genuine when they professed a concern with democracy in developing countries Which of these dynamics governmental commercial or social was the most influential in propelling efforts to encourage democratization and which helped explain the limits of democracy s international reach Did political economic and social actors form a broad network of international democratic momentum or did their respective perspectives increasingly diverge Exploring these questions the book presents extensive empirical material relating to Western policies in a number of developing regions covering the period from the mid 1990s to 2003 Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Official Fellow Nuffield College University of Oxford
