Exhibiting the Past Frederik Herman, Sjaak Braster, María del Mar del Pozo Andrés, 2022-12-19 With respect to public issues history matters With the worldwide interest for historical issues related with gender religion race nation and identity public history is becoming the strongest branch of academic history This volume brings together the contributions from historians of education about their engagement with public history ranging from musealisation and alternative ways of exhibiting to new ways of storytelling Doing History

Mark Donnelly, Claire Norton, 2020-11-16 *Doing History* bridges the gap between the way history is studied in school or as represented in the media and the way it is studied at university level. History as an academic discipline has dramatically changed in recent decades and has been enhanced by ideas from other disciplines, the influence of postmodernism and historians' incorporation of their own reflections into their work. *Doing History* presents the ideas and debates that shape how we do history today, covering arguments about the nature of historical knowledge and the function of historical writing, whether we can ever really know what happened in the past, what sources historians depend on and the relative value of popular and academic histories. This revised edition includes new chapters on public history and activist histories. It looks at global representations of the past across the centuries and provides up to date suggestions for further reading, presenting the reader with a thorough and current introduction to studying history at an academic level as well as a pathway to progress this study further. Clearly structured and accessibly written, it is an essential volume for all students embarking on the study of history.

The Built Environment Transformed Geoffrey Timmins, 2021-12-02 This book is concerned with the remarkable changes made to the built environment in Lancashire's main textile district, essentially the eastern and central parts of the county during the Industrial Revolution c1780-c1850. A case study approach is taken, with findings from investigations at six different types of site being presented. The sites included are water-powered mill remains in the Cheesden Valley near Rochdale, Barrow Bridge factory village near Bolton, the former handloom weavers colony at Club Houses, Horwich, Preston's Winckley Square, Eanam Wharf at Blackburn and to the north of Bolton, the road between Bromley Cross and Edgworth. The case studies show how in rural and urban areas alike, developments in industry, housing and transport greatly extended the built environment and brought striking new features to it. Emphasis is placed on interpreting the physical evidence the sites provide, linking it with that taken from various types of documentary source, especially historical maps. By making comparisons with developments occurring at similar types of site elsewhere in Britain as well as in Europe and North America, the forms the changes took are explained and their significance assessed. Additionally, insights are provided into the economic and social impact the changes brought, especially on the everyday lives that people led.

Feeling Things Stephanie Downes, Sally Holloway, Sarah Randles, 2017-12-30 This interdisciplinary essay collection investigates the various interactions of people feelings and things throughout premodern Europe It focuses on the period before mass production when limited literacy often prioritised material methods of communication The subject of materiality has been of increasing significance in recent historical inquiry alongside growing emphasis on the relationships between objects emotions and affect in archaeological and sociological

research The historical intersections between materiality and emotions however have remained under theorised particularly with respect to artefacts that have continuing resonance over extended periods of time or across cultural and geographical space *Feeling Things* addresses the need to develop an appropriate cross disciplinary theoretical framework for the analysis of objects and emotions in European history with special attention to the need to track the shifting emotional valencies of objects from the past to the present and from one place and cultural context to another The collection draws together an international group of historians art historians curators and literary scholars working on a variety of cultural literary visual and material sources Objects considered include books letters prosthetics religious relics shoes stone and textiles Many of these have been preserved in international galleries museums and archives while others have remained in their original locations even as their contexts have changed over time The chapters consider the ways in which emotions such as despair fear grief hope love and wonder become inscribed in and ascribed to these items producing emotional objects of significance and agency Such objects can be harnessed to create affirm or express individual relationships as for example in religious devotion and practice or in the construction of cultural communal and national identities *From Sources to Scrolls and Beyond* David M.
