Using Technology With Classroom Instruction That Works:

Using Technology with Classroom Instruction That Works Howard Pitler, Elizabeth R. Hubbell, Matt Kuhn, 2012-08-02

Technology is ubiquitous and its potential to transform learning is immense. The first edition of *Using Technology with Classroom Instruction That Works* answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of *Classroom Instruction That Works*, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: Setting objectives and providing feedback, Reinforcing effort and providing recognition, Cooperative learning, Cues, questions, and advance organizers, Nonlinguistic representations, Summarizing and note taking, Assigning homework and providing practice, Identifying similarities and differences, Generating and testing hypotheses. Each strategy-focused chapter features examples across grade levels and subject areas, and is drawn from real-life lesson plans and projects of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and most of all, more effective.

Using Technology with Classroom Instruction that Works Howard Pitler, Elizabeth Ross Hubbell, Matt Kuhn, 2012

Learn how to improve instruction by:
Collecting the right data the right way
Incorporating relevant data into everyone's daily life
Resisting the impulse to set brand new goals every year
Never settling for good enough
Anticipating changes big and small
Local and federal
Collaborating and avoiding privatized practice
Involving all stakeholders in identifying problems, setting goals, and analyzing data
Agreeing on what constitutes high quality instruction and feedback
The challenge is to understand that data, not intuition or anecdotal reports, are tools to be used in getting better at teaching students.
And teaching students effectively is what schools are all about.
Following the guidance in this book, overcome uncertainty and concerns about data as you learn to collect and analyze both soft and hard data and use their secrets for instructional improvement in your school.

Learning That Sticks Bryan Goodwin,Tonia Gibson,Kristin Rouleau,2020-06-05 In far too many classrooms the emphasis is on instructional strategies that teachers employ rather than on what students should be doing or thinking about as part of their learning

What's more students' minds are something of a mysterious black box for most teachers so when learning breaks down they're not sure what went wrong or what to do differently to help students learn. It doesn't have to be this way. Learning That Sticks helps you look inside that black box. Bryan Goodwin and his coauthors unpack the cognitive science underlying research-supported learning strategies so you can sequence them into experiences that challenge, inspire, and engage your students. As a result, you'll learn to teach with more intentionality, understanding not just what to do but also when and why to do it. By way of an easy-to-use six-phase model of learning, this book analyzes how the brain reacts to stores and retrieves new information. Helps you zoom out to understand the process of learning from beginning to end. Helps you zoom in to see what's going on in students' minds during each phase. Learning may be complicated but learning about learning doesn't have to be. And to that end, Learning That Sticks helps shine a light into all the black boxes in your classroom and make your practice the most powerful it can be. This product is a copublication of ASCD and McREL.

Teaching Generation Text Lisa Nielsen, Willyn Webb, 2011-10-20 Mobilizing the power of cell phones to maximize students' learning power. Teaching Generation Text shows how teachers can turn cell phones into an educational opportunity instead of an annoying distraction. With a host of innovative ideas, activities, lessons, and strategies, Nielsen and Webb offer a unique way to use students' preferred method of communication in the classroom. Cell phones can remind students to study, serve as a way to take notes, provide instant on-demand answers and research, be a great vehicle for home-school connection and record and capture oral reports or responses to polls and quizzes, all of which can be used to enhance lesson plans and increase motivation. Offers tactics for teachers to help their students integrate digital technology with their studies. Filled with research-based ideas and strategies for using a cell phone to enhance learning. Provides methods for incorporating cell phones into instruction with a unit planning guide and lesson plan ideas. This innovative new book is filled with new ideas for engaging learners in fun, free, and easy ways using nothing more than a basic text-enabled cell phone.
