Utopias A Brief History From Ancient Writings To Virtual Communities:

Utopias Howard P. Segal, 2012-03-02 This brief history connects the past and present of utopian thought from the first utopias in ancient Greece right up to present day visions of cyberspace communities and paradise. Explores the purpose of utopias, what they reveal about the societies who conceive them, and how utopias have changed over the centuries. Unique in including both non-Western and Western visions of utopia. Explores the many forms utopias have taken: prophecies and oratory, writings, political movements, world's fairs, physical communities, and also discusses high-tech and cyberspace visions for the first time. The first book to analyze the implicitly utopian dimensions of reform crusades like Technocracy of the 1930s and Modernization Theory of the 1950s and the laptop classroom initiatives of recent years. Heterotopia and Heritage

Preservation Smaranda Spanu, 2019-05-02 This book approaches the field of built heritage and its practices by employing the concept of heterotopia established by the French philosopher Michel Foucault. The fundamental understandings of heritage, its evolution, and practices all reveal intrinsic heterotopic features: the mirror function, its utopic drive, and its enclave-like nature. The book draws on previous interpretations of heterotopia and argues for a reading of heritage as heterotopia, considering various heritage mechanisms: heritage selection, conservation, and protection practices, and heritage as mnemonic device. In this regard, Reworking the six heterotopic principles, an analysis grid is designed and applied to various built heritage spaces: vernacular, religious, architecture, urban, 19th-century ensembles. Guided through this theoretical itinerary, the reader will rediscover the heterotopic lens as a minor yet promising Foucauldian device that allows for a better understanding of heritage and its everyday practices. **Utopia and Its Discontents**

Sebastian Mitchell, 2020-02-20 *Utopia and Its Discontents* traces literary representations of ideal communities from Plato to the 21st century. Each chapter offers close readings of key utopian and anti-utopian texts to demonstrate how they construct challenge and explore the ideas and forms of earlier utopian writings and the social and political ideals of their own periods. In this original and insightful study, Sebastian Mitchell demonstrates how literary utopias are often as much about the past as they are about the present and the future. *Utopia and Its Discontents* concludes by arguing against the idea that the utopian has been eclipsed by the dystopian in contemporary culture. Topics covered include Early political and philosophical authors such as Plato and Thomas More; Literary works from Jonathan Swift's *Gulliver's Travels* to George Orwell's *Nineteen Eighty-Four*; Speculative fiction writers such as H.G. Wells, Aldous Huxley, and Margaret Atwood; Ecological and feminist texts by Ernest Callenbach, Ursula Le Guin, and Marge Piercy; Twenty-first-century utopianism. This is an essential study for scholars and students of utopian literature.

Utopian Imaginings Victoria W. Wolcott, 2024-04-01 Sometimes that's all it takes to save a world you see. A new vision. A new way of thinking appearing at just the right time. These words were spoken by a fictional character in N.K. Jemisin's 2019 utopian novella *Emergency Skin*. But the idea of saving the world through utopian imaginings has a deep and profound history. At this moment of rupture with the related crises of the pandemic, racial uprisings, and climate change converging

Utopian Imaginings revisits this history to show how utopian thought and practice offer alternative paths to the future The third book in the Humanities to the Rescue series the volume examines both lived and imagined utopian communities from an interdisciplinary perspective While attentive to the troubled and troubling elements of different spaces and collectives Utopian Imaginings remains premised in hope culminating in a series of inspiring exemplars of the utopian potential of the college classroom today

The Nowhere Bible Frauke Uhlenbruch,2015-03-10 The Bible contains passages that allow both scholars and believers to project their hopes and fears onto ever changing empirical realities By reading specific biblical passages as utopia and dystopia this volume raises questions about reconstructing the past the impact of wishful imagination on reality and the hermeneutic implications of dealing with utopia good place yet no place as a method and a concept in biblical studies A believer like William Bradford might approach a biblical passage as utopia by reading it as instructions for bringing about a significantly changed society in reality even at the cost of becoming an oppressor A contemporary biblical scholar might approach the same passage with the ambition of locating the historical reality behind it finding the places it describes on a map or arriving at a conclusion about the social reality experienced by a historical community of redactors These utopian goals are projected onto a utopian text This volume advocates an honest hermeneutical approach to the question of how reliably a past reality can be reconstructed from a biblical passage and it aims to provide an example of disclosing not obscuring pre suppositions brought to the text

Automation and Utopia John Danaher,2019-09-24 Automating technologies threaten to usher in a workless future but John Danaher argues that this can be a good thing A world without work may be a kind of utopia free of the misery of the job and full of opportunities for creativity and exploration If we play our cards right automation could be the path to idealized forms of human flourishing

Heavens on Earth Michael Shermer,2018-01-09 A scientific exploration into humanity s obsession with the afterlife and quest for immortality from the bestselling author and skeptic Michael Shermer In his most ambitious work yet Shermer sets out to discover what drives humans belief in life after death focusing on recent scientific attempts to achieve immortality along with utopian attempts to create heaven on earth For millennia religions have concocted numerous manifestations of heaven and the afterlife and though no one has ever returned from such a place to report what it is really like or that it even exists today science and technology are being used to try to make it happen in our lifetime From radical life extension to cryonic suspension to mind uploading Shermer considers how realistic these attempts are from a proper skeptical perspective Heavens on Earth concludes with an uplifting paean to purpose and progress and how we can live well in the here and now whether or not there is a hereafter

Wolcott,2022-04-21 Victoria W Wolcott argues that utopianism is the little appreciated base of the visionary worldview that informed the prime movers of the Civil Rights Movement Idealism and pragmatism not utopianism are what tend to come to mind when we think about the motivating philosophies of the movement It is well known that many of its iconic moments were carefully executed products of planning not passion alone But Wolcott holds that pragmatism and idealism alike were grounded in nothing less than intensely utopian thought Key figures from Martin Luther King Jr and Coretta Scott to Marjorie Penney and Howard Thurman shared a belief in a radical pacificism that was Wolcott shows both specifically utopian and precisely engaged in changing the existing world Casting mid twentieth century civil rights activism in the light of utopianism ultimately allows us to see the power of dreaming in a profound and concrete fashion one that can be emulated in other times that are desperate for change like today *Tourist Utopias* Timothy Simpson,2025-10-01 Released on the 500 year anniversary of the publication of Sir Thomas More's *Utopia* this volume seeks to adapt and apply More's fecund imagination to the contemporary leisure landscape The contributors to this volume theorize and analyze a variety of tourist utopias a nascent socio-spatial form crucial to a post-industrial global economy From Disney World to Dubai Middle East to Marina Bay Macau to Abu Dhabi these sites share common characteristics that include their respective status as spaces of exception entrepreneurial governance regimes that rely on cooperation among state and non-state actors transient multinational populations immaterial and affective forms of labor and consumption superlative and iconic architecture and

Rethinking Music Education and Social Change Alexandra Kertz-Welzel, 2022 The arts and particularly music are well known agents for social change They can empower transform or question They can be a mirror of society s current state and a means of transformation They are often the last refuge when all attempts at social change have failed But are the arts able to live up to these expectations Can music education cause social change Rethinking Music Education and Social Change offers timely answers to these questions It presents an imaginative yet critical approach At once optimistic and realistic the

book assesses music education's relation to social change and offers a new vision for music education as utopian theory and practice. As an important topic in sociology and political science, utopia offers a new tradition of thinking and a scholarly foundation for music education's relation to social change. Metahumanism, Euro-Transhumanism and Sorgner's Philosophy Maurizio Balistreri, Aura Elena Schussler, 2024-01-01. This essay collection is a fascinating thorough and intellectually stimulating analysis of Stefan Lorenz Sorgner's theoretical frameworks and conceptualizations of Euro transhumanism, metahumanism, and the philosophy of posthuman art. The contributors address the most challenging philosophical, ethical, and aesthetic issues in the field of trans-critical post- and metahumanism, such as debates concerning Nietzsche as a weak proto-transhumanist, potential risks and benefits of artificial intelligence, brain-computer interfaces, and bio-enhancements, ecological crises, space travel, the use of human embryos for artistic purposes, robots as artists, humans as cyborgs, and more. This collection provides a critical introduction to Sorgner's philosophy as well as a complex intellectual engagement with the field of posthuman studies. It is a rich, reflective journey for all those interested in technology, ethics, art, and the posthuman paradigm shift. Global Citizen - Challenges and Responsibility in an Interconnected World Aksel Braanen Sterri, 2015-02-03. A globalized world places new demands on us as citizens. *Global Citizen: Challenges and Responsibility in an Interconnected World* gives insight and perspectives on what it means to be a citizen in a global world from Norway's most distinguished scholars. It poses and answers important questions such as: which duties and rights do we have as citizens in a globalized world; which institutions are just and sustainable; and how can a global ethic and a global worldview be reconciled with the fact that the lives of the greater part of the Earth's population are still local. *Global Citizen: Challenges and Responsibility in an Interconnected World* draws on insights from philosophy, jurisprudence, theology, and the social sciences to shed light on this manifold and important topic with relevance for policy makers, stakeholders, academics, but most important for us as citizens who need to take both a political and personal decision on how to live as a citizen in a global world. Technological Utopianism and the Idea of Justice Martin Sand, 2024-12-28. This open access book advances a modest defence of technological utopias. While technological utopianism is not devoid of risks and elitism, their benefits should not be discounted in an overall assessment. Rather than rejecting them based on a too narrow definition of utopianism, we must acknowledge their potential to exceed the individualist vs. collectivist dichotomy ascribed to traditional utopias. The author argues with reference to Rawls' idea of the basic structure that technological utopias challenge our understanding of the scope and location of justice and thereby advance the idea of justice. The book critically reviews the most recent literature in political philosophy where utopias are understood as ideal theories of justice and sides with recent contributions to Utopian Studies where utopias' potential to estrange from the present and galvanize action are underscored.

Constitutional Imaginaries Jiří Příbáň, 2021-09-30. This book offers a social theoretical analysis of imaginaries as constituent social forces of positive law and politics. Constitutional imaginaries invite constitutional and political theorists

philosophers and sociologists to rethink the concept of constitution as the normative legal limitation and control of political power. They show that political constitutions include societal forces impossible to contain by legal norms and political institutions. The constitution of society as one polity defined by the unity of topos, ethnos, nomos, that is the unity of territory, people, and their laws, informed the rise of modern nations and nationalisms as much as constitutional democratic statehood and its liberal and republican regimes. However, the imaginary of polity as one nation living on a given territory under the constitutional rule of law is challenged by the process of European integration and its imaginaries informed by transnational legal and societal pluralism, administrative governance, economic performativity, and democratically mobilised polity. This book discusses the sociology of imagined communities and the philosophy of modern social imaginaries in the context of transnational European constitutionalism and its recent theories, most notably the theory of societal constitutions. It offers a new approach to the legal constitutions as societal power formations evolving at national, European, and global levels. The book will be of interest to scholars and students interested in constitutional and European law, theory, and philosophy, as much as interdisciplinary and socio-legal studies of transnational law and society.

Revelation 21-22 in Light of Jewish and Greco-Roman Utopianism Eric J. Gilchrest, 2013-05-01. In *Revelation 21-22 in Light of Jewish and Greco-Roman Utopianism*, Eric J. Gilchrest offers a creative and compelling reading of Revelation 21-22 as understood through the lens of ancient utopianism. The work is in two parts, beginning with a detailed portrait of ancient utopianism based on Greco-Roman and Jewish traditions. The portrait sketches the topography of the utopian landscape, which includes a thorough account of various traditions using fourteen utopian topoi or motifs. The author then moves to a description of Revelation's new Jerusalem in light of these two utopian traditions. With sensitivity to how this text would have been read by each utopian perspective, the author constructs a unique reading of a classic passage that highlights the variety of ways the text originally may have been heard.

Rebuilding Babel Mark Crinson, 2017-06-30. Much of modernist architecture was inspired by the emergence of internationalism, the ethics and politics of world peace, justice, and unity through global collaboration. Mark Crinson here shows how the ideals represented by the Tower of Babel, built so the story goes by people united by one language, were effectively adapted by internationalist architecture, its styles and practices in the modern period. Focusing particularly on the points of convergence between modernist and internationalist trends in the 1920s and again in the immediate post-war years, he underlines how such architecture utilised the themes of a cooperative community of builders and a common language of forms. The International Style was one manifestation of this new way of thinking, but Crinson shows how the aims of modernist architecture frequently engaged with the substance of an internationalist mindset, in addition to sharing surface similarities. Bringing together the visionaries of internationalist projects, including Le Corbusier, Bruno Taut, Berthold Lubetkin, Walter Gropius, and Mies van der Rohe, Crinson interweaves ideas of evolution, ecology, utopia, regionalism, socialism, free trade, and anti-colonialism to reveal the possibilities heralded by modernist architecture. Furthermore, he re-connects

pivotal figures in architecture with a cast of polymath internationalists such as Patrick Geddes Lewis Mumford Julian Huxley Rabindranath Tagore and H G Wells to provide a richly detailed socio cultural framework This is a book crafted for students and scholars of architecture and art theory as well as for those interested in the history of twentieth century optimism about the world and its architecture
