

7. Install the shift mechanism in the gear housing in a way that the screw (1) will be displaced towards star-board.

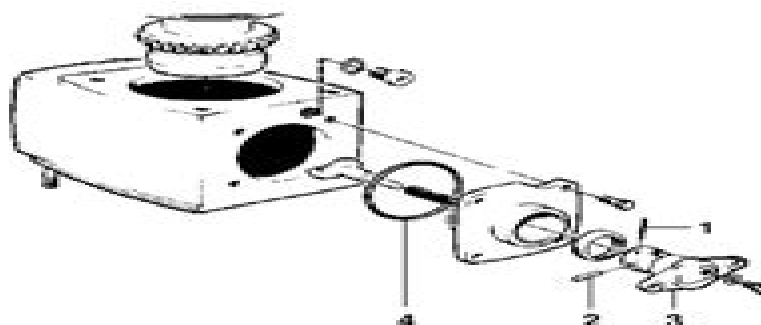

NOTE! Make sure that the sliding shoe (2) is turned to a position corresponding the one in the picture. The shift mechanism will not function if the sliding shoe is turned the opposite way. Now install the shift mechanism in the sterndrive.

Set the shift mechanism in neutral and remove all adjustment pads (3) and tighten the screw. Now the vertical shaft in the upper gear housing cannot be turned. Insert a shim at the time on the screw until it is possible to turn the shaft.

Models 290 and 290A: Add one more shim to the screw (1).

Coat the shim/shims and the screw with sealing compound, Volvo Penta part no. 1161099-5, or Permatex® no. 3 when the adjustment is done and then tighten the screw.

Shift mechanism type 2

8. Knock out the load pin (1, figure above) and pull out the pin (2) and the eccentric piston (3). Remove the sealing ring (4). Wash the parts and check for wear. Replace parts if necessary.
