Pioneering Women in American Mathematics Judy Green, Jeanne LaDuke, 2009 More than 14 per cent of the PhD s awarded in the United States during the first four decades of the twentieth century went to women a proportion not achieved again until the 1980s This book is the result of a study in which the authors identified all of the American women who earned PhD s in mathematics before 1940 and collected extensive biographical and bibliographical information about each of them By reconstructing as complete a picture as possible of this group of women Green and LaDuke reveal insights into the larger scientific and cultural communities in which they lived and worked The book contains an extended introductory essay as well as biographical entries for each of the 228 women in the study The authors examine family backgrounds education careers and other professional activities They show that there were many more women earning PhD s in mathematics before 1940 than is commonly thought Extended biographies and bibliographical information are available from the companion website for the book The material will be of interest to researchers teachers and students in mathematics history of mathematics history of science women s studies and sociology The data presented about each of the 228 individual members of the group will support additional study and analysis by scholars in a large number of disciplines

Women Who Count: Honoring African American Women Mathematicians Shelly M. Jones, 2019-07-30 Tessellations palindromes tangrams oh my Women Who Count Honoring African American Women Mathematicians is a children s activity book highlighting the lives and work of 29 African American women mathematicians including Dr Christine Darden Mary Jackson Katherine Johnson and Dorothy Vaughan from the award winning book and movie Hidden Figures Although the book is geared toward children in grades 3 8 it is appropriate for all ages The book includes portrait sketches and biographies for the featured mathematicians each followed by elementary school and middle school activity pages Children will enjoy uncovering mathematicians names in word searches unscrambling math vocabulary words solving equations to decode interesting facts using logical thinking to uncover magic squares locating hidden objects on an I Spy page and more They will also read about the important contributions of Drs Martha Euphemia Lofton Haynes Evelyn Boyd Granville and Marjorie Lee Browne the first three African American women to receive doctoral degrees in mathematics Other

women profiled include contemporary mathematicians who will inspire today's children to become tomorrow's leaders. **Women Who Count** is a must read for parents and children alike. **Against All Odds** Eva Kaufholz-Soldat, Nicola M.R. Oswald, 2020-07-29 This book presents an overview of the ways in which women have been able to conduct mathematical research since the 18th century despite their general exclusion from the sciences. Grouped into four thematic sections, the authors concentrate on well-known figures like Sophie Germain and Grace Chisholm Young as well as those who have remained unnoticed by historians so far. Among them are Stanisława Nidodym, the first female students at the universities in Prague at the turn of the 20th century and the first female professors of mathematics in Denmark. Highlighting individual biographies, couples in science, the situation at specific European universities and sociological factors influencing specific careers from the 18th century to the present, the authors trace female mathematicians' status as it evolved from singular and anomalous to virtually commonplace. The book also offers insights into the various obstacles women faced when trying to enter perhaps the most male discipline of all and how some of them continue to shape young girls' self-perceptions and career choices today. Thus, it will benefit scholars and students in STEM disciplines, gender studies and the history of science, women in science, mathematics and at institutions and those working in mathematics education. **Power in Numbers** Talithia Williams, 2018-04-10 From rocket scientists to code breakers, fascinating stories of women who overcame obstacles, shattered stereotypes and pursued their passion for math. Notices of the American Mathematical Society. With more than 200 photos and original interviews with several of the amazing women covered. **Power in Numbers: The Rebel Women of Mathematics** is a full color volume that puts a spotlight on the influence of women on the development of mathematics over the last two millennia. Each biography reveals the life of a different female mathematician from her childhood and early influences to the challenges she faced and the great achievements she made in spite of them. Learn how: After her father terminated her math lessons, Sofia Kovalevskaya snuck algebra books into her bed to read at night. Emmy Noether became an invaluable resource to Albert Einstein while she was in the Navy. Native American rocket scientist Mary Golda Ross developed designs for fighter jets and missiles in a top secret unit. Katherine Johnson's life or death calculations at NASA meant that astronauts such as Alan Shepard and John Glenn made it home alive. Shakuntala Devi multiplied massive numbers in her head so her family could eat at night. Pamela Harris proved her school counselors wrong when they told her she would only succeed as a bilingual secretary. Carla Cotwright Williams began her life in the dangerous streets of South Central Los Angeles before skyrocketing to a powerful career with the Department of Defense in Washington DC. These women are a diverse group but their stories have one thing in common: At some point on their journeys, someone believed in them and made them think the impossible was perhaps not so impossible. A quick read full of dramatic stories and eye-catching illustrations. MAA Reviews. I found myself marveling at the personal anecdotes and quotes throughout the book. Notices of the American Mathematical Society. **World Women in Mathematics 2018** Carolina Araujo, Georgia Benkart, Cheryl E. Praeger, Betül Tanbay, 2019-11-16
