American Women Afield Marcia Bonta,1995 Armed with hand lenses and opera glasses traveling on foot by buggy or model T they explored thousands of miles of deserts forests beaches and jungles They were pioneering women naturalists who observed studied and experimented then returned to write up their findings What resulted were exquisitely written and scientifically accurate accounts of their explorations into natural science a field long dominated by men Marcia Myers Bonta has collected the most charming and sensitive writings of twenty five women naturalists of the late nineteenth through early twentieth centuries and supplemented them with well researched biographical profiles From Susan Fenimore Cooper s early warnings about the profligate use of natural resources to Mary Treat s tenacious defense of her scientific discoveries from Alice Eastwood s defiance of convention and Caroline Dormon s Lucy Braun s and Rachel Carson s impassioned pleas to save the earth American Women Afield catalogs the determination and devotion of these early scientists and acknowledges their invaluable contributions to ornithology entomology botany agrostology and ecology Each excerpt in this book reveals the important role these women played not only as writers but as popularizers of nature study at a time when very little literature on this subject was available to the general public Whether scientist or generalist the reader will discover insights into their methods of field work as they tame wasps camp out in jungles climb unnamed mountaintops or sit patiently in the woods for hours Written as a companion book to Bonta s earlier published Women in the Field America s Pioneering Women Naturalists American Women Afield adds an additional dimension to female scientific history by presenting the authors own words Luckily for the reader Bonta has scoured libraries museums and private collections to uncover letters out of print journal articles field notes and selected book chapters from the recesses of academia Each selection is unique in style tone and subject and clearly shows not only the authors love of nature but their desire to communicate that love to others American Women Afield is a charming informative and revealing account of pioneering women mentors whose lives have been forgotten for far too long **Women in Field Biology** Martha L. Crump,Michael J. Lannoo,2022-08-23 Women are contributing to disciplines once the sole domain of men Field biology has been no different The history of women field biologists embedded in a history largely made and recorded by men has never been written Compilations of biographies have been assembled but the narrative their story has never been told In part this is because

many expressed their passion for nature as writers artists collectors and educators during eras when women were excluded from the male centric world of natural history and science The history of women field biologists is intertwined with men s changing views of female intellect and with increasing educational opportunities available to women Given the preponderance of today s professional female ecologists animal behaviorists systematists conservation biologists wildlife biologists restoration ecologists and natural historians it is time to tell this story the challenges and hardships they faced and still face and the prominent role they have played and increasingly play in understanding our natural world For a broader perspective we profile selected European women field biologists but our primary focus is the journey of women field biologists in North America Each woman highlighted here followed a unique path For some personal wealth facilitated their work some worked alongside their husbands Many served as invisible assistants to men receiving little or no recognition Others were mavericks who carried out pioneering studies and whose published works are still read and valued today All served as inspiration and proved to the women who would follow that women are as capable as men at studying nature in nature Their legacy lives on today The 75 female field biologists interviewed for this book are further testament that women have the intellect stamina and passion for fieldwork **American Women of Science since 1900** Tiffany K.

Chambers,Kerry L. Nicholson,2022-11-01 The first book to address the challenges and opportunities for women especially from underrepresented communities in wildlife professions Women in Wildlife Science is dedicated to the work of promoting equity diversity and inclusion in wildlife conservation and management Editors Carol L Chambers and Kerry L Nicholson collaborate with a diverse team of authors to analyze the status and celebrate the achievements of women in wildlife science They share proven models and propose new methods to increase the inclusion of women in wildlife professions based on an intersectional framework Centering perspectives from

LGBTQ people women of color and members of other marginalized communities this is a groundbreaking and vitally important resource Covering academic and professional spheres *Women in Wildlife Science* draws on enlightening personal stories and peer reviewed scientific literature unavailable anywhere else to explain the challenges women face in the field of wildlife conservation and management The contributors tackle pivotal issues from recruitment into academic programs to hiring practices and ways to support career advancement in federal state local tribal and private sectors Each chapter includes practical advice and original exercises constructed to help administrators educators managers allies and mentors move intentions into action This pragmatic guide will help to ensure a more diverse just and equitable future for a workforce dedicated to preserving wildlife and the whole of the natural world

**Women and Science** Marilyn B. Ogilvie, Kerry L. Meek, 2018-12-07 First Published in 1996 Following the author's previous work *Women in Science Antiquity through the Nineteenth Century* in 1986 an increased interest in feminism science and gender issues resulted in this subsequent title This book will be valuable to scholars working in a variety of academic areas and will be useful at different educational levels from secondary through graduate school This annotated bibliography of approximately 2700 entries also includes fields nationality periods persons institutions reference and theme indexes

**Early American Nature Writers** Daniel Patterson, 2007-11-30

At a time when the environment is of growing concern to students and general readers nature writing is especially meaningful This book profiles the literary careers of 52 early American nature writers such as John James Audubon Ralph Waldo Emerson Caroline Stansbury Kirkland Thomas Jefferson Henry David Thoreau and Mabel Osgood Wright Each entry is written by an expert contributor and discusses the writer's life and works Entries close with primary and secondary bibliographies and the encyclopedia ends with suggestions for further reading Global warming pollution and other issues have made the environment a topic of constant discussion these days Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world in an age of commercial expansion Some of the most famous writers of the 18th and 19th centuries wrote about nature and their works are stylistic masterpieces At a time when students are being encouraged to read and write about nonfiction these masterworks of early American nature writing are all the more important This book gives students and general readers a welcome introduction to early American nature writers

*She Heard the Birds* Andrea D'Aquino, 2025-02-26 Meet Florence Merriam Bailey a pioneering birder and activist who changed the way we study birds forever as told through the evocative collage style of artist Andrea D'Aquino As a young girl Florence Merriam Bailey fell in love with the outdoors especially birds whose songs and flight captivated her She listened waited and watched to better understand her feathered friends and wrote many books including one of the first field guides to American birds Her work ultimately led to better protection for birds and to the scientific study of birds in nature instead of in a lab *She Heard the Birds* the latest book from *A Life Made by Hand The Story of Ruth Asawa* author Andrea D'Aquino brings to life the story of a woman ahead of her time D'Aquino's striking full page collages make each page a delight to read

**A Passion for Birds** Mark V. Barrow, Jr., 2021-08-10 In the decades following the Civil War as industrialization urbanization and economic expansion increasingly reshaped the landscape many Americans began seeking adventure and aesthetic gratification through avian pursuits By the turn of the century hundreds of thousands of middle and upper class devotees were rushing to join Audubon societies purchase field guides and keep records of the species they encountered in the wild Mark Barrow vividly reconstructs this story not only through the experiences of birdwatchers collectors conservationists and taxidermists but also through those of a relatively new breed of bird enthusiast the technically oriented ornithologist In exploring how ornithologists struggled to forge a discipline and profession amidst an explosion of popular interest in natural history *A Passion for Birds* provides the first book length history of American ornithology from the death of John James Audubon to the Second World War Barrow shows how efforts to form a scientific community distinct from popular birders met with only partial success The founding of the American Ornithologists Union in 1883 and the subsequent expansion of formal educational and employment opportunities in ornithology marked important milestones in this campaign Yet by the middle of the twentieth century when ornithology had finally achieved the status of a modern profession its practitioners remained dependent on the services of birdwatchers and other amateur enthusiasts Environmental issues also loom large in Barrow's account as he traces areas of both cooperation and conflict between ornithologists and wildlife conservationists Recounting a colorful story based on the interactions among a wide variety of bird lovers this book will interest historians of science environmental historians ornithologists birdwatchers and anyone curious about the historical roots of today's birding boom
