TriDoku Djape,2013-10-10 Is this Sudoku Well YES and NO TriDoku puzzles have the same number of cells as Sudoku 81 However there are no rows or columns Instead there are triangles In fact the whole grid has gone triangular The nonets are there but instead of being 3x3 squares they've become triangles too Oh and did you know that in Tridoku puzzles there are also lots of hexagons However despite all those differences the basic principle of Sudoku still applies you cannot repeat a number in any of the defined regions It's a lot of fun and a chance to develop new problem solving skills ENJOY *Triangular Sudoku* Djape,2010-09-07 A collection of very refreshing new variant of Sudoku puzzles in triangular format is here called TriDoku Unlike in ordinary Sudoku TriDoku puzzles are played on a triangular instead of a rectangular grid But that's not the only difference Instead of rows and columns you have to use triangles and hexagons and so on Instead of repeatedly solving classic Sudoku puzzles this book offers you something to refresh your problem solving skills There are 150 puzzles in this book out of which 10 are TriDoku X diagonal and 10 Killer TriDoku puzzles just to make things even more interesting
