MINI LESSON	ACTIVITY	INTERACTIVE NOTEBOOK
Use the slides provided, walk students through the steps to multi-digit addition. 1. Break-apart into number bonds based on place value. 2. Add each place value. 3. Check your answer. 4. Write your final answer. Go through the first 4-5 problems modeling and then have students complete the final 2-3 on their whiteboards to demonstrate understanding.	Using either the Google Slides, Google Sheets, or Cut and Paste version, have students complete the Addition Matching activity. Students will have a set of addition equations to solve and will have either to cut and paste, click and drag or type the correct answer in the box below the equation. Students will need to record their answers on the recording sheet, before cutting and pasting so that you can see where they made a mistake if that occurs. Depending on your students' needs, there is a version with and without regrouping.	There are a few different options that you can use based on what your students are needing. Look at pages 25-28 to see the different types to decide. There are pages covering: • Even or Odd Sort • Adding 2-Digit Numbers without Regrouping • Adding 2-Digit Numbers with Regrouping Each includes different versions for differentiation.
