Sponsored by the sterr Fonds zur F rderung der Wissenschaftlichen Forschung project nr P4567 **Behavioral Types in Programming Languages** Davide Ancona,2016 A recent trend in programming language research is to use behavioral type theory to ensure various correctness properties of large scale communication intensive systems Behavioral types encompass concepts such as interfaces communication protocols contracts and choreography The successful application of behavioral types requires a solid understanding of several practical aspects from their representation in a concrete programming language to their integration with other programming constructs such as methods and functions to design and monitoring methodologies that take behaviors into account This survey provides an overview of the state of the art of these aspects which we summarize as the pragmatics of behavioral types **Programming Languages and Systems** Giuseppe Castagna,2009-03-09 ETAPS 2009 was the 12th instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprised five conferences CC ESOP FASE FOSSACS TACAS 22 satellite workshops ACCAT ARSPA WITS Bytecode COCV COMPASS FESCA FInCo FORMED GaLoP GT VMT HFL LDFA MBT MLQA OpenCert PLACES QAPL RC SafeCert TAASN TERMGRAPH andWING four tutorials andseveninvitedlectures excludingthose thatwere specific to the satellite events The five main conferences received 532 submissions including 30 tool demonstration papers 141 of which were accepted 10 tool demos giving an overall acceptance rate of about 26% with most of the conferences at around 25% Congratulations therefore to all the authors who made it to the final programme I hope that most of the other authors will still have found a way of participating in this exciting event and that you will all continue submitting to ETAPS and contributing towards making it the best conference on software science and engineering The events that comprise ETAPS address various aspects of the system development process including specification design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on the one hand and soundly based practice on the other
