

NEEDLE THREADING

Lastly needle must be threaded. Follow the 'path' colored GREEN on chart for left needle, taking the thread around the green tension control and through the thread guides with ■ symbols.

Follow the 'path' colored YELLOW on chart for right needle, taking the thread around the yellow tension control and through the thread guide with ◆ symbols, but bypassing check spring on the tension control.

When overlocking with three threads using the right needle only (see page 14), thread

the yellow tension control, pulling check spring up and past the pointed hook until thread can be slipped into the hook. When the thread is released, the check spring will return to original position with the thread in place.

Finally thread needle(s) from FRONT to BACK and then under the presser foot, leaving about 10 cm of thread(s).

Should it be necessary at any time to re-thread the lower looper, ALWAYS remove thread(s) from needle(s) first to avoid tangling.
