Women Justice Tanzania Eastern Africa:

Women, Land and Justice in Tanzania Helen Dancer, 2015 Recent decades have seen a wave of land law reforms across Africa in the context of a land rush and land grabbing But how has this been enacted on the ground and in particular how have women experienced this This book seeks to re orientate current debates on women s land rights towards a focus on the law in action Centring on cases involving women litigants the book considers the extent to which women are realising their interests in land through land courts and follows the progression of women s claims to land from their social origins through processes of dispute resolution to judgment Unedited summary from book cover

Women's Law and Grassroots Justice in Uganda Okumu Wengi, 2011 This posthumous publication is a collection of essays some of which are based on the authors research work while others record her thoughts on issues she regarded as important The materials which were written between 1991 and 1996 cover a range of subjects that have been tied together under the theme of women law and justice in Uganda They represent the authors central concerns interests and views as they developed over the years

Gender and the Global Land Grab Andrea M. Collins, 2024-06-15 Since the year 2000 millions of hectares of land in the Global South have been acquired by foreign investors for large scale agricultural projects displacing and disrupting rural communities Women are especially disadvantaged by the global land grab they are less likely to inherit control or make decisions over land but often need land to support themselves their families and their communities While international organizations have developed global guidelines to improve land governance tensions still run high as the current policies fall short Gender and the Global Land Grab introduces a feminist conceptual framework to analyze land governance policy around the world Andrea Collins shows how gender norms biases and expectations shape land politics at different levels of governance Drawing on examples from sub Saharan Africa and with an in depth case study of land politics in Tanzania the book assesses guidelines developed by institutions such as the Food and Agriculture Organization of the United Nations and the World Bank to highlight essential considerations for developing and implementing gender sensitive policy Illustrating how gender shapes resource policy across all levels of political activity Gender and the Global Land Grab provides valuable tools for transforming global policymaking

Gender Justice and Legal Pluralities Rachel Sieder, John

McNeish, 2013-06-17 Gender Justice and Legal Pluralities Latin American and African Perspectives examines the relationship between legal pluralities and the prospects for greater gender justice in developing countries Rather than asking whether legal pluralities are good or bad for women the starting point of this volume is that legal pluralities are a social fact Adopting a more anthropological approach to the issues of gender justice and women s rights it analyzes how gendered rights claims are made and responded to within a range of different cultural social economic and political contexts By examining the different ways in which legal norms instruments and discourses are being used to challenge or reinforce gendered forms of exclusion contributing authors generate new knowledge about the dynamics at play between the contemporary contexts of

legal pluralities and the struggles for gender justice Any consideration of this relationship must be located within a broader historically informed analysis of regimes of governance

Women's Land Rights & Privatization in Eastern Africa Birgit Englert, Elizabeth Daley, 2008 This collection examines women's land rights in East Africa in the context of land tenure reforms and privatization

Mapping Global Justice Arnaud Kurze, Christopher K. Lamont, 2022-10-14 Persistent international conflicts increasing inequality in many regions of the world and acute environmental and climate related threats to humanity call for a better understanding of the processes actors and tools available to face the challenges of achieving global justice This book offers a broad and multidisciplinary survey of global justice bridging the gap between theory and practice by connecting conceptual frameworks with a panoply of case studies and an in depth discussion of practical challenges Connecting these critical aspects to larger moral and ethical debates is essential for thinking about large abstract ideas and applying them directly to specific contexts Core content includes Key debates in global justice from across philosophy postcolonial studies political science sociology and criminology The origins of global justice and the development of the human rights agenda peacekeeping and post conflict studies Global poverty and sustainable development Global security and transnational crime Environmental justice public health and well being Rather than providing a blueprint for the practice of global justice this text problematizes efforts to cope with many justice related issues The pedagogical approach is designed to map the difficulties that exist between theory and praxis encourage critical thinking and fuel debates to help seek alternative solutions Bringing together perspectives from a wealth of disciplines this book is essential reading for courses on global justice across criminology sociology political science anthropology philosophy and law

African Feminisms and Women in the Context of Justice in Southern Africa Cori Wielenga, 2021-10-07 This book explores justice on the ground in Southern African communities and in particular the roles that women play in these processes Justice on the ground is often critiqued for being male dominated and patriarchal This volume seeks to unpack and problematize this assumption through the case studies of Namibia Zimbabwe Mozambique and South Africa Contributions focus on the lived experiences of women and the intersections of race class culture and the colonial experience that shape their lives In the rural and peri urban contexts discussed in this book justice on the ground is found to be relational The network of relationships between people and the well being and health of a community as an integral whole continue to be of central importance as the survival of the community depends on the entire community functioning interdependently An engagement with African feminisms is helpful in providing a number of lenses or simply questions through which to read the case studies These case studies reveal the complex and organic ways in which women have power and influence in relation to justice on the ground which may not be immediately obvious

Reflections on Race Relations: A Personal Odyssey Godfrey Mwakikagile, 2021-07-03 The author looks at race relations when he was growing

up in Africa and his experiences in the United States He grew up when his home country was under colonial rule He later lived for many years in another country the United States that was also dominated by whites He examines similarities between the two white dominated societies and looks at how life was for non whites in his home country during those years It is a work of comparative analysis in terms of race relations and draws heavily on the author s personal experience He not only addresses the subject from a personal perspective but also in the broader context of society as a whole A lot of what he has written is based on what he has observed and experienced through the years amounting to a personal journey through life in colonial Africa and in the United States He also looks at his life with African Americans including those who were members of an organisation that sponsored African students to study in the United States He was one of those sponsored by the organisation His reflections on race relations have been partly shaped by the existence of racism in the United States as a major problem in contemporary times The malignancy of racism in the United States was underscored by massive protests across the country by people of all races the largest since the civil rights movement following the brutal murder of a black man George Floyd by a white police officer in May 2020 an execution that sent shock waves round the globe where there were also protests in many countries in support of racial equality in America protests the author says could have been the beginning of the second civil rights movement Never before had so many whites in every city and every state participated in such demonstrations alongside blacks demanding racial justice And never before had such demonstrations been organised and carried on on sustained basis throughout the country for several months The status of black people in the United States with whom he interacted for many years prospects for racial harmony and reconciliation and the quest for racial justice are some of the subjects he has addressed in the book drawing on his experiences as someone who has firsthand knowledge of the subject because of what he went through when he was growing up as a colonial subject in Africa and when he lived in the United States as someone who was not spared the agony and the anguish of being a victim of racism It is an odyssey that is reflected in the lives of many other people making the book more than just an account of the experiences of the author alone It is a reflection of other lives as well especially of those whose collective identity is also shared by the author
