The reality of women's conflict driven migration however falls between these two axes. The essays in this volume seek to fill this gap by examining the changes in status identities and power relations among women and men as they move from a conflict situation at home to migrant camps to the post conflict or peace building phase when they return home. The contributors use a variety of research methods including ethnography, dialogue, oral history, textual analyses and consciousness raising techniques.

Oxford Textbook of Migrant Psychiatry Dinesh Bhugra, 2021-02-04

Migrant psychiatry is an evolving subdiscipline within cultural psychiatry that deals with the impact of migration on the mental health of those who have migrated and those who work with these groups and provide services to them. Stress related to migration affects migrants and their extended families either directly or indirectly. The process of migration is not just a phase but leads on to a series of adjustments including acculturation which may occur across generations. Factors such as changes in diet, attitudes and beliefs and overall adjustment are important in settling down and making the individuals feel secure. This period of adjustment will depend upon the individual migrant's pre migration experiences, migration process and post migration experiences but also upon an individual's personality, social support and emotional response to migration. Socio demographic factors such as age, gender, educational and economic status will all play a role in post migration adjustment. In order to understand the impact on individuals not only the type of migration and different stressors but also the types of psychological mechanisms at a personal level and the resources and processes at a societal level need to be explored. Despite the number of refugees and asylum seekers around the world increasing at an astonishing rate, the mental health needs of migrants are often ignored by policy makers and clinicians. The Oxford Textbook of Migrant Psychiatry is designed to serve as the comprehensive reference resource on the mental health of migrants, bringing together both theoretical and practical aspects of the mental health needs of refugees and asylum seekers for researchers and professionals. Individual chapters summarise theoretical constructs related to theories of migration, the impact of migration on mental health and adjustment, collective trauma, individual identity and diagnostic fallacies. The book also covers the practical aspects of patient management including cultural factors, ethnopsychopharmacology, therapeutic interaction and therapeutic expectation and psychotherapy. Finally, the book will examine special clinical problems and special patient groups. Part of the authoritative Oxford Textbooks in Psychiatry series, this resource will serve as an essential reference for psychiatrists, mental health professionals, general practitioners, primary care physicians, social workers, policy makers and voluntary agencies dealing with refugees and asylum seekers.

Contesting Masculinities and Women's Agency in Kashmir Amya Agarwal, 2022-07-18

What is the significance of gender and masculinities in understanding conflict? Through an ethnographic study conducted between 2013 and 2016, this book explores the politics of competing and sometimes overlapping masculinities represented by the state, armed forces and the non state actors in the Kashmir valley. In addition, the book broadens the understanding of women's agency through its engagement with the construction, performance and interplay of masculinities in the conflict.

Combining existing elements of both feminist research and critical scholarship on men and masculinities the book highlights the significance of foregrounding the interplay of men's identities in conflicts to understand agency in a meaningful way. Through the focus on the simultaneous play of multiple masculinities the book also questions the oversimplified and monolithic usage of masculinity being associated only with violence in conflicts. The empirical data in the book includes interviews and narratives of multiple stakeholders belonging to diverse vantage points in the Kashmir conflict. Some of these include activists, widows, wives of the disappeared, ex-militants, surrendered militants, participants of the stone pelting movement, mothers of sons killed in the conflict, women representatives of the village Halqa Panchayats and army personnel. The book also draws from alternative material in the form of graffiti, folk songs, poetry on graves and slogans. Through anecdotal reminiscence the author reflects on the challenges of field research in Kashmir that served as an opportunity for self-contemplation.

Gender, Conflict and Peace in Kashmir Seema Shekhawat, 2014-03-06. Discusses the role of women in militancy in Kashmir from a historical perspective. Provided by publisher.
