**The Temptation of Non-Being** Artemy Magun, 2024-05-02 Why do we enjoy artworks that depict disasters and suffering Is this a hangover from the Modernist impulse to break the rules of harmony Is there actually a proper way to perform negativity in art without resorting to nihilism The Temptation of Non Being uses these fundamental questions to paint a picture of contemporary art as beset by an outbreak of the negative and to construct a new theory of art as a medium of complex negativity The negative in art is explained not as a simple negation or destruction but as a multifaceted polymorphous structure with a vast range of strategies and techniques from parody and pastiche to defamiliarization and non resemblance Charting the depth of these negative practices Artemy Magun shows how they become progressively more complex and explicit illustrating them with interdisciplinary examples from Lars von Trier Jacek Malczewski Andrei Platonov and Fyodor Dostoyevsky At the heart of this layered nested structure lies an understanding of Modern aesthetics that helps to answer even more questions how can the testing probing nature of art lead to this preoccupation with the negative Why does this negativity emerge in the first place What can it tell us about art itself and how it functions in society This is an erudite and provocative analysis that enriches the ongoing evaluation of both high and low art
