Who Controls The Internet Illusions Of A Borderless World:

Who Controls the Internet? Jack Goldsmith, Tim Wu, 2006-03-17 In this provocative new book the authors tell the fascinating story of the Internet's challenge to governmental rule in the 1990s and of the fate of one idea that the Internet might liberate users forever from government borders and even their physical selves [Solving the Internet Jurisdiction Puzzle](#) Dan Jerker B. Svantesson, 2017-10-06 Internet jurisdiction has emerged as one of the greatest and most urgent challenges online affecting areas as diverse as e-commerce data privacy law enforcement content take downs cloud computing e-health cyber security intellectual property freedom of speech and cyberwar In this innovative book Professor Svantesson presents a vision for a new approach to Internet jurisdiction based on an extensive period of research dedicated to the topic The book demonstrates that our current paradigm remains attached to territorial thinking that is out of sync with our modern world especially but not only online Having made the claim that our adherence to the territoriality principle is based more on habit rather than on any clear and universally accepted legal principles Professor Svantesson advances a new jurisprudential framework for how we approach jurisdiction a framework that unites private and public international law He also proposes several other reform initiatives aimed at equipping us to solve the Internet jurisdiction puzzle In addition the book provides a history of Internet jurisdiction and challenges our traditional categorisation of different types of jurisdiction It places Internet jurisdiction in a broader context and outlines methods for how to properly understand and work with rules of Internet jurisdiction While [Solving the Internet Jurisdiction Puzzle](#) paints a clear picture of the concerns involved and the problems that need to be overcome this book is distinctly aimed at finding practical solutions anchored in a solid theoretical framework Professor Svantesson argues that many of the Internet jurisdiction problems we face are due to a sleepwalking like acceptance of orthodox thinking [Solving the Internet Jurisdiction Puzzle](#) acts as a wake up call to this issue **The**

Historical Web and Digital Humanities Niels Brügger, Ditte Laursen, 2019-03-07 The Historical Web and Digital Humanities fosters discussions between the Digital Humanities and web archive studies by focussing on one of the largest entities of the web namely national and transnational web domains such as the British French or European web With a view to investigating whether and how web studies and web historiography can inform and contribute to the Digital Humanities this volume contains a number of case studies and methodological and theoretical discussions that both illustrate the potential of studying the web in this case national web domains and provide an insight into the challenges associated with doing so Commentary on and possible solutions to these challenges are debated within the chapters and each one contributes in its own way to a web history in the making that acknowledges the specificities of the archived web The Historical Web and Digital Humanities will be essential reading for those with an interest in how the past of the web can be studied as well as how Big Data approaches can be applied to the archived web As a result this volume will appeal to academics and students working and studying in the fields of Digital Humanities internet and media studies history cultural studies and

communication *Researching Internet Governance* Laura Denardis, Derrick Cogburn, Nanette S. Levinson, Francesca Musiani, 2020-09-08 Scholars from a range of disciplines discuss research methods theories and conceptual approaches in the study of internet governance The design and governance of the internet has become one of the most pressing geopolitical issues of our era The stability of the economy democracy and the public sphere are wholly dependent on the stability and security of the internet Revelations about election hacking facial recognition technology and government surveillance have gotten the public's attention and made clear the need for scholarly research that examines internet governance both empirically and conceptually In this volume scholars from a range of disciplines consider research methods theories and conceptual approaches in the study of internet governance *The Internet Police* Nate Anderson, 2013-08-12 Chaos and order clash in this riveting exploration of crime and punishment on the Internet Once considered a borderless and chaotic virtual landscape the Internet is now home to the forces of international law and order It's not just computer hackers and cyber crooks who lurk in the dark corners of the Web the cops are there too In *The Internet Police* Ars Technica deputy editor Nate Anderson takes readers on a behind the screens tour of landmark cybercrime cases revealing how criminals continue to find digital and legal loopholes even as police hurry to cinch them closed From the Cleveland man whose natural male enhancement pill inadvertently protected the privacy of your e mail to the Russian spam king who ended up in a Milwaukee jail to the Australian arrest that ultimately led to the breakup of the largest child pornography ring in the United States Anderson draws on interviews court documents and law enforcement reports to reconstruct accounts of how online policing actually works Questions of online crime are as complex and interconnected as the Internet itself With each episode in *The Internet Police* Anderson shows the dark side of online spaces but also how dystopian a fully ordered alternative would be Includes an afterword that details law enforcement's dramatic seizure of the online black market Silk Road

Transformations in Criminal Jurisdiction Micheál Ó Floinn, Lindsay Farmer, Julia Hörnle, David Ormerod KC, 2023-08-24 Can traditional approaches to criminal jurisdiction adapt to the new global reality of the digital era In this innovative book leading experts in criminal international and internet law unite to address this fundamental question They consider how jurisdictional regimes are orientated around concepts of territoriality and extraterritoriality how these categories are increasingly blurred in the digital era and how a range of jurisdictional transformations are occurring in the process Part I presents novel doctrinal empirical and theoretical perspectives on criminal jurisdiction exploring how states are shaping and reimagining jurisdictional concepts in the crafting and interpretation of criminal offences and the ramifications of increasing jurisdictional concurrency in state practice Part II focuses on the investigative and enforcement powers of the state to assess how these issues are transforming traditional understandings of jurisdictional rules and boundaries the challenges and opportunities that these present for law enforcement authorities and the sorts of constraints and safeguards that may be necessary as a result The picture that emerges is a world of jurisdictional rules in a state of flux which demands the diversity

of legal perspectives presented in this book for documenting rationalising and moving beyond the transformations that are taking shape in modern statecraft Extraterritorialities in Occupied Worlds Exterritory Project, 2016 The concept of extraterritoriality designates certain relationships between space law and representation This collection of essays explores contemporary manifestations of extraterritoriality and the diverse ways in which the concept has been put to use in various disciplines Some of the essays were written especially for this volume others are brought here together for the first time The inquiry into extraterritoriality found in these essays is not confined to the established boundaries of political conceptual and representational territories or fields of knowledge rather it is an invitation to navigate the margins of the legal juridical and the political but also the edges of forms of representation and poetics Within its accepted legal and political contexts the concept of extraterritoriality has traditionally been applied to people and to spaces In the first case extraterritorial arrangements could either exclude or exempt an individual or a group of people from the territorial jurisdiction in which they were physically located in the second such arrangements could exempt or exclude a space from the territorial jurisdiction by which it was surrounded The special status accorded to people and spaces had political economic and juridical implications ranging from immunity and various privileges to extreme disadvantages In both cases a person or a space physically included within a certain territory was removed from the usual system of laws and subjected to another In other words the extraterritorial person or space was held at what could be described as a legal distance In this respect the concept of extraterritoriality presupposes the existence of several competing or overlapping legal systems It is this notion of being held at a legal distance around which the concept of extraterritoriality may be understood as revolving China, Africa, and the Future of the Internet Iginio Gagliardone, 2019-06-15 China is transforming Africa's information space It is assisting African broadcasters with extensive loans training and exchange programmes and has set up its own media operations on the continent in the form of CCTV Africa In the telecommunications sector China is helping African governments to expand access to the internet and mobile phones with rapid and large scale success While Western countries have ambiguously linked the need to fight security threats with restrictions of the information space China has been vocal in asserting the need to control communication to ensure stability and development Featuring a wealth of interviews with a variety of actors from Chinese and African journalists in Chinese media to Chinese workers for major telecommunication companies this highly original book demonstrates how China is both contributing to the Africa rising narrative while exploiting the weaknesses of Western approaches to Africa which remain trapped between an emphasis on stability and service delivery on the one hand and the desire to advocate human rights and freedom of expression on the other Arguing no state can be understood without attention to its information structure the book provides the first assessment of China's new model for the media strategies of developing states and the consequences of policing Africa's information space for geopolitics security and citizenship

Information Technology in Librarianship Gloria J. Leckie, John E. Buschman, 2009 In the last 15 years the ground both in

terms of technological advance and in the sophistication of analyses of technology has shifted At the same time librarianship as a field has adopted a more skeptical perspective libraries are feeling market pressure to adopt and use new innovations and their librarians boast a greater awareness of the socio cultural economic and ethical considerations of information and communications technologies Within such a context a fresh and critical analysis of the foundations and applications of technology in librarianship is long overdue Communicating Politics in the Twenty-First Century Karen Sanders,2009 Practical topical and theoretical this book takes an original look at how politics is communicated around the world by politicians governments and the media industries It features use of international examples and a broad coverage of a burgeoning area of study It presents a truly engaging and readable style From propaganda and protests to Marx and Obama this book provides an engaging look at politics in the media Historical detail and contemporary examples are used to explore essential theory and key research in the field Topical and comprehensive this book covers everything students need to know about the global world of political communication Library Journal Melvil Dewey,Richard Rogers Bowker,L.
