Why Do They Kill Men Who Murder Their Intimate Partners:

Why Do They Kill? David Adams (Ed. D.), 2007 This study of domestic homicide in America examines the lives and motivation of men who kill their intimate partners *Perpetrators of Intimate Partner Sexual Violence* Louise McOrmond-Plummer, Jennifer Y. Levy-Peck, Patricia Easteal, 2016-12-08 Research shows that intimate partner sexual violence (IPSV) is the most common form of sexual assault. Professional focus is often on the victim but more information is needed about the perpetrators in order to have a fuller understanding of this crime. The very nature of IPSV sexual assault within a relationship means that professionals who work with victims must understand the dynamics of perpetrators as well. This new book will distill the knowledge that exists about perpetrators of IPSV. It includes chapters by authors who have worked directly with IPSV perpetrators and covers important subjects such as addressing IPSV in batterer groups, police management strategies, the danger of IPSV to children, the different types of violence perpetrators use, and prevention approaches for young people. There is also still a widely held view that rapists are strangers in alleyways. This book is intended to educate professionals about who is a perpetrator as well as to highlight the very real danger these perpetrators represent, including a heightened risk of lethality. The contributors look at the social context of IPSV and the implications for prevention and provide hands-on knowledge to practitioners in a number of fields. The book may also be used within the academic context in fields such as social work, sociology, counseling, psychology, medicine, nursing, criminal justice, and law.

When Men Murder Women R. Emerson Dobash, Russell P. Dobash, 2015-04-01 In the United States and Great Britain, 20-30% of all homicides involve the killing of a woman by a man. In *When Men Murder Women*, Dobash and Dobash, two seasoned researchers and longtime collaborators in the study of violence against women, reveal what they learned from a three-year study that included 866 homicide case files and 200 in-depth interviews with murderers in prison. They focus on intimate partner murder, sexual murder, and the murder of older women and compare each of these three types with those in which men murder other men. Each type is examined in depth and detail in a separate section that begins with an overview of relevant research and is followed by a comprehensive examination of the murder event and the lifecourse of the perpetrators. There has never before been a comprehensive book that has covered the entire scope of homicide cases in which men murder women. The result is this essential text for students, professionals, policy makers, and researchers studying violence, gender, and crime.

Abetting Batterers Andrew R. Klein, Jessica L. Klein, 2020-02-24

Whatever the number, domestic violence victims remain far too many for a preventable crime. More and more victims of intimate partner violence are reaching out to police, prosecutors, and judges only to be sorely disappointed, even betrayed. While laws and programs have multiplied over the last few decades to address domestic violence, the country is getting safer for almost everyone except for women who have or have had abusive male intimate partners. Andrew R. Klein and Jessica L. Klein look at the criminal justice response to domestic violence across America today, ranging from police to prosecutors and courtrooms across the nation. Abetting Batterers reveals the troubling pattern of inattention and incompetence that compromises the safety of women and encourages their male abusers to continue their abuse and violence. Although criminal justice system agencies vary among cities, towns, and counties within the same state, they all too often relegate domestic violence to the backburners of the system, dismissing victims and ignoring even the most serious and chronic abusers. The variation reveals the real problem in preventing intimate partner violence lies in these agencies' commitment and will rather than their ability to do the job. The authors unveil what is working in regard to protecting victims of domestic violence and holding their abusers accountable, and they suggest strategies for ensuring that what is being done right can be replicated and become the law and practice across the nation. The wide variation in how intimate partner violence is handled by similar jurisdictions demonstrates the real problem in preventing it lies in these agencies' commitment rather than ability to do the job. This book proves to be invaluable in understanding what is and is not being done in the reality of domestic violence in America.
