The European Union Illuminated A. El-Agraa, 2015-05-05 The EU is under stress Many believe in the euro's demise because they blame it for the 2008 financial crisis and the unwelcome austerity measures Many resent the immigrants from the new EU member states threatening the survival of the Single European Market Many complain of a Brussels diktat seeking an escape from joint EU decisions Several member states want to unilaterally deal with the enhanced competition from the emerging markets especially China undermining the EU's common commercial policy run by a single EU commissioner And many in the UK want its exit from the EU diluting EU unity and reducing its global influence These concerns are either misguided or require a stronger EU to deal with them this book aims to address these issues by considering the nature importance and future of the European Union **European Union and Environmental**

European Integration Since the 1920s Mark Hewitson, 2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union

The European Union and Supranational Political Economy Riccardo Fiorentini, Guido Montani, 2014-12-05 The financial crisis originated in 2008 in the United States had a dramatic impact on the world economy The European Union was immediately involved but its reaction to the crisis was clearly inadequate The misgovernment of the European economy not only put at risk the European Monetary Union but it also caused further hindrances to the recovery of the global economy The global financial turmoil shook deep rooted beliefs The doctrine of international neo liberalism is more and more criticized Nevertheless the critics of neo liberalism focus their attention on the relationship between the state and the market as if the nation states with their international organisations have enough

power for an effective global governance of the world economy The model of European supranational integration though seriously imperfect can suggest some new way out from the crisis even at the world level based on a new relationship between the supranational government of the Union and the market In this book several academic disciplines are involved international economics international political economy international law international relations political theory and democratic theory Adopting such a multidisciplinary theoretical perspective the volume tries to answer the following question Is a more supranational Europe able to provide a better government of the EMU Does this reform involve more European democracy

Mapping Foreign Correspondence in Europe Georgios Terzis, 2014-10-17 The book studies the current trends of foreign correspondence in Europe The EU's expansion has had abundant effects on news coverage and some of the European capitals have become home to the biggest international press corps in world So who are these professional strangers stationed in Europe and how do they try to make their stories that are clearly important in today's interconnected world interesting for viewers and readers This book represents the first Pan European study of foreign correspondents and their reporting It includes chapters from 27 countries and it aims to study them and the direction flow and pattern of their coverage as well as answer questions regarding the impact of new technologies on the quantity frequency and speed of their coverage Do more sophisticated communications tools yield better international news coverage of Europe Or does the audience's increasing apathy and the downsizing of the foreign bureaus offset these advances And how do the seemingly unstoppable media trends of convergence commercialization concentration and globalization affect the way Europe and individual European countries are reported
